Redefines the theoretical and thematic contents of world literature by considering it in connection with film. What gets lost when we understand film as essentially different from literature? What gets lost when we think them essentially the same? Does the constructed difference between literature and film also create social and political exclusions, exclusions that may exacerbate class struggle or exclusions of certain ways of thinking the future as different? *Film as World Literature* seeks to undo disciplines and disciplinarity, the division between film and literature, indeed conceals the possibilities of world by bracketing out undisciplined parts. Contributors apply ideas of translatability and untranslatability not just as a linguistic exercise of transfers between language groups, cultures, and national origins, but also as an approach to media and transfers between media. Is film a visual acknowledgement that literary language is by definition multilingual, that is, film a place where political conflicts, as Bakhtin observed, can be rendered visible? Chapters discuss film's relation to world literature not only by considering literary adaptations across nations, regions, languages, ideologies, and contexts, but also by exploring film's intersections with literary theory, narrative history, genre, and experimentation. *Film as World Literature* calls for recognition that while the category of world demands a radical defense in the face of risks to democracy, the world that literature and film combined bring forth must interrogate the conditions for a future politics of interaction, engagement, belonging, and difference. **Modeling Musical Analysis** Assistant Professor of Music Theory Kim Loeffert, John Peterson, Associate Professor of Music Theory John Peterson, Kim Loeffert, 2024-12-25.
