Management with Online Study Tools 12 Months Danny Samson, Timothy Donnet, Richard L. Daft, 2017-10-25 Samson Daft Donnet's Management is a robust foundation text providing a balance of broad theoretical content with an engaging easy to understand writing style. It covers the four key management functions: planning, organising, leading, and controlling, conveying to students the elements of a manager's working day. Along with current management theory and practice, the authors integrate coverage of innovation, entrepreneurship, agile workplaces, social media, and new technology throughout. This sixth edition features a new author on the team and contains updates to content based on recent research. Real-life local and international examples showcase the ongoing changes in the management world. Focusing on a skills approach, they bring concepts to life for students, supporting motivation, confidence, and mastery. Each part concludes with a contemporary continuing case study focusing on car company Toyota as it faces managerial challenges and opportunities in the region.

Coordination, Cooperation, and Control Randall G. Holcombe, 2020-07-23 There are two ways people coordinate their actions: through cooperation exercised by economic power and through control exercised by political power. When economic and political power are held by the same people, the result is stagnation; when those who hold economic power are not the same people who hold political power, the result is progress. This book presents the ways in which economic power and political power can be separated and how they can remain so by analyzing the nature of power and the differences between economic and political power. The book then discusses the history of economic and political power, including hunter-gatherer societies, agrarian societies, and modern commercial and industrial societies. This background lends insight into why political and economic power were typically held by the same people and why recently those without political power have been able to acquire economic power. Incentives play a key role in understanding how those two types of power can become separated and why there is always a tendency for them to recombine. But ideas also play a crucial role, including the influence of the Enlightenment on the progress that has occurred in the last several hundred years. **Kiplinger's Personal Finance**
