Mobilities in Remote Places Phillip Vannini,2023-07-21 Mobilities in Remote Places explores the meanings challenges and opportunities of remoteness as practiced and experienced by those who live and work in some of the world's most remote communities As mobilities around the world proliferate in countless forms the meanings of remoteness undergo significant change Places once considered impossibly distant have appeared to become closer more accessible and less distinct from global centers of geopolitical power But instead of disappearing altogether configurations of remoteness evolve manifesting themselves through new possibilities new challenges and new insecurities Drawing from a variety of case studies from around the globe the contributors of the book examine remoteness as an outcome of evolving mobility constellations Rather than defining remoteness as an absolute or objective time distance condition the book shows how remoteness is a practice experience and representation that is situated relational and emergent This collection of original and thought provoking chapters will be of interest to students and researchers in the humanities and social sciences with an interest in mobilities place and human geography Chapter 10 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Behind the Startup Benjamin Shestakofsky, 2024-03-19 Readers will find a real life The Office Silicon Valley version alternately comical and poignant New York Times This systematic analysis of everyday life inside a tech startup dissects the logic of venture capital and its consequences for entrepreneurs workers and societies In recent years dreams about our technological future have soured as digital platforms have undermined privacy eroded labor rights and weakened democratic discourse In light of the negative consequences of innovation some blame harmful algorithms or greedy CEOs Behind the Startup focuses instead on the role of capital and the influence of financiers Drawing on nineteen months of participant observation research inside a successful Silicon Valley startup this book examines how the company was organized to meet the needs of the venture capital investors who funded it

Investors push startups to scale as quickly as possible to inflate the value of their asset Benjamin Shestakofsky shows how these demands create organizational problems that managers solve by combining high tech systems with low wage human labor With its focus on the financialization of innovation Behind the Startup explains how the gains generated by these companies are funneled into the pockets of a small cadre of elite investors and entrepreneurs To promote innovation that benefits the many rather than the few Shestakofsky compellingly argues that we must focus less on fixing the technology and more on changing the financial infrastructure that supports it
