

A romantic fantasy illustration of a young man and woman sitting on a large, ornate blue armchair in a vast library. The woman, with long brown hair and a white headband, wears a white dress with a blue skirt and holds a green book. The man, with dark hair, wears a brown patterned jacket and holds a quill and an open book. They are both looking at the books. The library is filled with floor-to-ceiling bookshelves packed with books. A glowing, ethereal figure of a woman in a white dress appears behind the couple, surrounded by swirling purple and pink smoke. The floor is covered with a purple patterned rug and several open books. The word "Romantasy" is written in a large, white, cursive font across the bottom of the image.

of articulatory constraint model of coarticulation it clearly demonstrates that the typology and direction of these sound changes may very largely be accounted for by the coarticulatory effects occurring between adjacent or neighbouring phonetic segments and by the degrees of articulatory constraint imposed by speakers on the production of vowels and consonants The phonetically based explanations presented here are formulated on the basis of coarticulation data from speech production and perception research carried out during the last fifty years and are complemented with data on the co-occurrence of phonetic segments in lexical forms of the languages being considered Attention is also paid to the role that positional and prosodic factors play in sound change implementation as well as to the cognitive and peripheral strategies involved in segmental replacements elisions and insertions

From Latin to Romance in Sound Charts Peter Boyd-Bowman, 1980 This handbook offers a synopsis of the regular changes that Latin words underwent in the course of their evolution into modern Romance languages Italian Spanish Portuguese and French with their English cognates Although it is intended for the nonspecialist students of Romance philology will find it useful as a ready reference and as a source of abundant examples of Latin sound changes The synopsis is presented in the form of separate alphabetical charts for each major sound change The rules stated as simply as possible do not generally explain the evolution of the changes but only the end results For those desiring further information there are notes after most rules outlining exceptions to or modifications of that rule and often sketching successive stages in the development of the sound Several minor or sporadic sound changes are also treated in note form Each chart is supplemented by a list of additional words illustrating the same sound change

From Latin to Roman in Sound Charts has been used successfully as a graduate level text for such courses as History of Spanish History of French and Romance Linguistics
