Connor, 2024-09-13 Mid Century Romance chronicles a revival of the historical novel in the middle decades of the twentieth century in the cultures of British modernism and international communism Born of a national turn in world politics these novels met the turbulence of mid century history with narratives of national becoming roadmaps to situate their readers in the pattern of social change Their writers were often mindful of the genre s romantic era heritage they saw themselves as following in the footsteps of Sir

Walter Scott and they drew on the same rescued remains of primitive poetry and popular antiquities that romanticism first used to construct its versions of national identity culture and tradition This book shows how the impulse to salvage traces of ancestral culture and press them to new purpose links the mid century national historical novel to the rise of radical social history and magical realism Post war anticommunism shaped a tradition of the novel as a preserve of art and the individual Mid Century Romance counters with a different genealogy of the British and world novel whose object is society and the future of community the nation and its people It situates its cast of British writers including the modernists Hope Mirrlees and Virginia Woolf the communists Jack Lindsay and Sylvia Townsend Warner the eccentric modernist and sometime fellow traveller John Cowper Powys and the New Left luminary Raymond Williams in a transnational perspective that reaches from Bihar India to Bahia Brazil

Gender from Latin to Romance Michele Loporcaro, 2018 This book explores grammatical gender in the Romance languages and dialects and its evolution from Latin Michele Loporcaro investigates the significant diversity found in the Romance varieties in this regard he draws on data from the Middle Ages to the present from all the Romance languages and dialects discussing examples from Romanian to Portuguese and crucially also focusing on less widely studied varieties such as Sursilvan Neapolitan and Asturian The investigation first reveals that several varieties display more complex systems than the binary masculine feminine contrast familiar from modern French or Italian Moreover it emerges that traditional accounts whereby neuter gender was lost in the spoken Latin of the late Empire cannot be correct instead the neuter gender underwent a range of different transformations from Late Latin onwards which are responsible for the different systems that can be observed today across the Romance languages The volume provides a detailed description of many of these systems which in turns reveals a wealth of fascinating data such as varieties where husbands are feminine and others where wives are masculine dialects in which nouns overtly mark gender but only in certain syntactic contexts and one Romance variety Asturian in which it appears that grammatical gender has split into two concurrent systems The volume will appeal to linguists from a range of backgrounds including Romance linguistics historical linguistics typology and morphosyntax and is also of relevance to those working in sociology gender studies and psychology

Coarticulation and Sound Change in Romance Daniel Recasens, 2014-04-15 This volume should be of great interest to phoneticians phonologists and both historical and cognitive linguists Using data from the Romance languages for the most part the book explores the phonetic motivation of several sound changes e g glide insertions and elisions vowel and consonant insertions elisions assimilations and dissimilations Within the framework of the DAC degree of articulatory constraint model of coarticulation it clearly demonstrates that the typology and direction of these sound changes may very largely be accounted for by the coarticulatory effects occurring between adjacent or neighbouring phonetic segments and by the degrees of articulatory constraint imposed by speakers on the production of vowels and consonants The phonetically based explanations presented here are formulated on the basis of coarticulation data from speech production and perception research carried out during

the last fifty years and are complemented with data on the co occurrence of phonetic segments in lexical forms of the languages being considered Attention is also paid to the role that positional and prosodic factors play in sound change implementation as well as to the cognitive and peripheral strategies involved in segmental replacements elisions and insertions

The Romance of Adultery Peggy McCracken, 1998-03-29 Peggy McCracken offers a feminist historicist reading of Guenevere Iseult and other adulterous queens of Old French literature and situates romance narratives about queens and their lovers within the broader cultural debate about the institution of queenship in twelfth and thirteenth century France Moving among a wide selection of narratives that recount the stories of queens and their lovers McCracken explores the ways adultery is appropriated into the political structure of romance McCracken examines the symbolic meanings and uses of the queen's body in both romance and the historical institutions of monarchy and points toward the ways medieval romance contributed to the evolving definition of royal sovereignty as exclusively male

Manual of Romance Word Classes Anna-Maria De Cesare, Giampaolo Salvi, 2024-09-02 Word classes are linguistic categories serving as basis in the description of the vocabulary and grammar of natural languages While important publications are regularly devoted to their definition identification and classification in the field of Romance linguistics we lack a comprehensive state of the art overview of the current research This Manual offers an updated and detailed discussion of all relevant aspects related to word classes in the Romance languages In the first part word classes are discussed from both a theoretical and historical point of view The second part of the volume takes as its point of departure single word classes described transversally in all the main Romance languages while the third observes the relevant word classes from the point of view of specific Romance based varieties The fourth part explores Romance word classes at the interface of grammar and other fields of research The Manual is intended as a reference work for all scholars and students interested in the description of both the standard major Romance languages and the smaller lesser described Romance based varieties

Johannes Kabatek,Albert Wall,2013-11-15 This book envisions the study of bare noun phrases as a field of research in its own right rather than an accessory matter in the wider domain of nominal determination Combining insights from different theoretical backgrounds and extending the empirical coverage of bare noun phenomena the ten contributions provide new perspectives on long standing but still actively debated problems as well as investigations into previously ignored issues The volume focuses on the wide range of bare noun phenomena in Romance languages including Spanish

Catalan Brazilian and European Portuguese Italian and French but also widens its inherently comparative perspective to languages such as Bulgarian and Modern Hebrew The authors discuss the importance of cross linguistic patterns in the modeling of the syntax and semantics of noun phrases and of common noun denotations the role of information structure as well as that of discourse traditions and coordination The Romance of Motoring T. There is a growing awareness of the significance of constructions in grammar in the world's languages To date there has not been a single volume that addresses the issues of constructions within a functional Role and Reference Grammar RRG account The book is a collection of articles that will serve the scholarly community as a reference work on the role place and significance of constructions within this functional model of grammar As a result this volume represents the first instance of cross linguistic comparison of these important discourse and syntax related phenomena The articles cover a variety of typologically different languages including German Irish Spanish French Japanese Yaqui Tepehua Totonacan Persian and English and they offer new data on the role of constructions within the RRG theory in these languages Further this volume contributes towards providing a comprehensive overview of grammatical constructions which are central to our understanding of how human languages function in a functional linguistics perspective This scholarly work is grounded in a functionally oriented model that makes strong claims of descriptive and typological adequacy The book will represent a
