The Second Volume on Inputs and Initiatives includes 25 research papers broadly divided in four sections: namely Open and Distance Learning, Teacher Education, Inputs, Information and Communication Technology, Intervention, and Perspectives of Human Values. These Volumes will be helpful to the students of higher education and teacher education as well as teachers, researchers, experts, policy makers, and development administrators working for quality education.

Sustainable Agriculture Reviews Eric Lichtfouse, 2013-02-12. Sustainable agriculture is a rapidly growing field aiming at producing food and energy in a sustainable way for humans and their children. Sustainable agriculture is a discipline that addresses current issues such as climate change, increasing food and fuel prices, poor nation starvation, rich nation obesity, water pollution, soil erosion, fertility loss, pest control, and biodiversity depletion. Novel solutions are proposed based on integrated knowledge from sciences as diverse as agronomy, soil science, molecular biology, chemistry, toxicology, ecology, economy, philosophy, and social sciences. Because actual society issues are now intertwined, global and fast developing sustainable agriculture will bring solutions to build a safer world. This book series gathers review articles that analyze current agricultural issues and knowledge, then propose alternative solutions. It will therefore help all scientists, decision makers, professors, farmers, and politicians who wish to build a safe agriculture, energy, and food system for future generations.
