Neoliberalism 2.0: Regulating and Financing Globalizing Markets L. Nijs, 2016-01-26 In today s increasingly globalized environment many economic fundamentals need to be reconsidered in order to regain stability in the global marketplace One such consideration is the failing dynamics of the international tax infrastructure Neoliberalism 2 0 brings a 21st century assessment of the Pigovian taxes considering a completely new calibration of the international tax systems inspired by the historically developed Pigovian tax model The book considers the impact neoliberalism had and will have on regulatory infrastructure democracy in an era of globalization and reduced legitimation of the national state The Pigovian model brings home the often forgotten relationship between taxation as a part of the regulatory sphere macro economics and the political philosophical context in which law and economics emerge The model also takes into account the phenomena of globalization and financialization and is tested using the financial sector as an example This book addresses the many challenges a Pigovian shift would imply for the sovereign and its national economies Neoliberalism 2 0 demonstrates the ability to design a paradigm changing alternative to the current tax infrastructure while taking into account a low economic growth environment of the future the implications of globalization and the changing relationship between citizens and their state

The Economics of Family Taxation Alessandro Balestrino, 2023-04-26 This book reflects the reality of most taxpayers. It provides a comprehensive and up to date treatment of optimal tax issues from a household economics perspective. A unified and integrated approach is employed to analyze optimal taxation in a homogeneous way. The author adopts a household production approach to allow a critical understanding of the way tax policy impacts economic agents. This way home activities can be studied with the same toolbox normally employed for the market activities. This is motivated by the fact that in reality most agents act from within a family and their interaction with the economy at large and tax policy in particular is mediated by the interdependence of the family members' choices. Although taxation is typically studied in a framework in which the economic agents are isolated individuals, the aim of the book is to provide a comprehensive treatment of family taxation within this approach, focusing on the normative side: social welfare maximising taxation. As a consequence of the book's analysis, many important and established results in public economics may have to be revised. The book will be useful to both graduate students and researchers alike in that it adopts a rigorous analytical language but also includes ample intuitive explanations. *Joint Committee on Taxation Tax Modeling Project and 1997 Tax Symposium Papers*, 1997
