The Public Relations of Everything Robert E. Brown, 2014-10-30 The public relations of everything takes the radical position that public relations is a profoundly different creature than a generation of its scholars and teachers have portrayed it Today it is clearly no longer limited if it ever has been to the management of communication in and between organizations Rather it has become an activity engaged in by everyone and for the most basic human reasons as an act of self creation self expression and self protection The book challenges both popular dismissals and ill informed repudiations of public relations as well as academic and classroom misconceptions In the age of digitization and social media everyone with a smart phone Twitter and Facebook accounts and the will and skill to use them is in the media The PR of everything the ubiquitousness of public relations takes a perspective that is less concerned with ideas of communication and information than with experience and drama a way of looking at public relations inside out upside down and from a micro rather than a macro level Based on a combination of the research of PR practice and critical thinking analysis of theory and founded in the author's extensive corporate experience this book will be invaluable reading for scholars and practitioners alike in Public Relations Communications and Social Media
