Pursuant to H. Con. Res. 71 United States. Congress. Senate. Committee on the Budget,2017 **Hungary** International Monetary Fund. European Dept.,2024-08-02 Hungary is emerging from a period of shocks The pandemic Russia s war in Ukraine and crisis related stimulus widened fiscal and external imbalances and triggered double digit inflation in 2022 Thanks to an effective monetary policy response aided by falling commodity prices and a tighter fiscal stance in 2023 inflation came down significantly while the labor market and financial sector remained resilient A large current account deficit in 2022 turned into a surplus and output is starting to recover However significant challenges remain The fiscal deficit and public debt to GDP ratios are well above 2019 levels and various windfall taxes have created investor uncertainty Interest rate caps and subsidized lending measures have distorted market rates and a significant state presence in key sectors impedes competition **Tax Policy Reforms 2024 OECD and Selected Partner Economies** OECD,2024-09-30

economy EMDE This suggests the need for improved tax policy and administration Until fiscal positions have strengthened the burden of climate adaptation will disproportionately fall on the private sector If allowed sufficient flexibility private sector adaptation could offset about one third of the likely climate damage by 2050 This may however require governments to remove obstacles that prevent workers and firms from moving across locations and activities As growth prospects dim the challenge grows to create jobs for South Asia s rapidly expanding working age population South Asia s large diasporas could become a source of strength if their knowledge networks and other resources can be better tapped for investment and trade

Okamoto,2012-12-06 The Japanese population is aging faster than any other in the world The percentage of Japan's population aged 65 and above was only 7.1% in 1970 but just 30 years later in 2000 it reached 17.2% A declining birth rate and a rising average life expectancy will continue to push this trend further This situation is causing serious problems for Japanese society Structural reforms especially tax and social security reforms to accommodate this drastic demographic change have become an urgent policy issue The purpose of this book is to establish guidelines for tax and social security reforms in Japan in terms that are both efficient and equitable In this study an extended life cycle general equilibrium model is employed to rigorously take account of the rapidly aging Japanese population The simulation approach adopted in our analysis permits us to calculate the effects of alternative policy packages on capital accumulation and economic welfare This enables us to make proposals for concrete economic policies
