It also includes the debate about the optimum level of interchange fees and its determination, tourist test, and presents the original framework for assessing the impact of interchange fee regulatory reductions for the market participants: consumers, merchants, acquirers, issuers, and card organisations. The framework addresses three areas of concern in reference to the transmission channels of interchange fee reductions: pass through, the card scheme domain triangle, and payment organisation issuer acquirer. The book discusses the effects of regulatory interchange fee reductions in Australia, USA, Spain, and most specifically Poland.
