AI, Ethics, and Discrimination in Business

Marco Marabelli, 2024-05-02 This book takes a historical approach to explore data algorithms their use in practice through applications of AI in various settings and all of the surrounding ethical and DEI implications Summarizing our current knowledge and highlighting gaps it offers original examples from empirical research in various settings such as healthcare social media and the GIG economy The author investigates how systems relying on a binary structure machines work in systems that are instead analogic societies Further he examines how underrepresented populations who have been historically penalized by technologies can play an active role in the design of automated systems with a specific focus on the US legal and social system One issue is that main tasks of machines concern classification which while efficient for speeding up decision making processes are inherently biased Ultimately this work advocates for ethical design and responsible implementation and deployment of technology in organizations and society through government sponsored social justice in contrast with free market policies This interdisciplinary text contributes to the timely and relevant debate on algorithmic fairness biases and potential discriminations It will appeal to researchers in business ethics and information systems while building on theories from anthropology psychology sociology management marketing and economics
