C. Scott, 2024-09-22 *Love in the Time of Self-Publishing* Christine M. Larson, 2025-09-16 Lessons in creative labor solidarity and inclusion under precarious economic conditions As writers musicians online content creators and other independent workers fight for better labor terms romance authors offer a powerful example and a cautionary tale about self organization and mutual aid in the digital economy In *Love in the Time of Self Publishing* Christine Larson traces the forty year history of Romancelandia a sprawling network of romance authors readers editors and others who formed a unique community based on openness and collective support Empowered by solidarity American romance writers once disparaged literary outcasts became digital publishing's most innovative and successful authors Meanwhile a new surge of social media activism called attention to Romancelandia's historic exclusion of romance authors of color and LGBTQ writers forcing a long overdue cultural reckoning Drawing on the largest known survey of any literary genre as well as interviews and archival research Larson shows how romance writers became the only authors in America to make money from the rise of ebooks increasing their median income by 73 percent while other authors plunged by 40 percent The success of romance writers Larson argues demonstrates the power of alternative forms of organizing influenced by gendered working patterns It also shows how networks of relationships can amplify or mute certain voices Romancelandia's experience Larson says offers crucial lessons about solidarity for creators and other isolated workers in an increasingly risky employment world
