Do Rating Announcements convey new Information? Jan Klobucnik, 2010-07-15 Inhaltsangabe Introduction Since the beginning of the last century investors in capital markets have strongly relied on rating agencies assessments of credit quality to decide on investments Due to their important role in debt markets they are supposed to provide accurate ratings without delay However cases like the defaults of WorldCom or Enron have damaged their reputation In particular credit rating agencies have been heavily criticized for their role during the financial crisis of 2007 2009 Many economists blame the rating agencies for having played a major part in the securitization process of mortgage loans by providing too high rating grades and thus sowing the seeds of the crisis Having rated credit derivatives like collateralized debt obligations with best grades the rating agencies encouraged banks and other financial institutions to keep these assets in their portfolios As a result it caused severe problems for the banking sector when these products heavily lost in value Along with imprecise assessments of creditworthiness the slow reaction of rating agencies has been criticized over the last few years Therefore the question of how well the agencies assess credit quality arises This question is of great importance because of their dominant role on capital markets and the fact that decisions are made upon their ratings To put it more precisely this study asks whether the agencies process and convey new information to the market On the other hand it might be the case that market participants anticipate any change in the credit quality of a company before these institutions publish their assessments Answering this question is of particular importance if the rating announcements convey unknown information and the market reacts then rating agencies are a systemic part of capital markets and policy should consider stricter regulation to prevent manipulation and failures like those described above Conversely if their announcements do not contain any new information or to put it differently if markets react faster then we could think about using market based indicators instead in order to assess credit risk In this case the economic task of signaling creditworthiness could be handed over among others to Credit Default Swaps see Chapter 2 which is also suggested by Hart Zingales This thesis contributes to the field of rating agencies performance measurement Evaluating their announcements with the **FDIC Banking Review** ,2005 **Justice of the Peace and Local Government Review** ,1839 **Kiplinger's Personal Finance** ,1992-09 The most trustworthy source of information available today on savings and investments taxes money management home ownership and many other personal finance topics **Kiplinger's Personal Finance** ,1992-08 The most trustworthy source of information available today on savings and investments taxes money management home ownership and many other personal finance topics **Pediatric Gastrointestinal and Liver Disease E-Book** Robert Wyllie, Jeffrey S. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and gripping novel that will keep you guessing until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
