Bucher, 2021-04-27 Facebook has fundamentally changed how the world connects No other company has played a greater role in the history of social networking online Yet Facebook is no longer simply a social networking site or social media platform Facebook is Facebook Taina Bucher shows how Facebook has become an idea of its own something that cannot be fully described using broader categories Facebook has become so commonplace that most people have a conception of what it is yet it increasingly defies categorization If we want to understand Facebook's power in contemporary society and culture

Bucher argues we need to start by challenging our widespread conception of what Facebook is. Tracing the development and evolution of Facebook as a social networking site, platform infrastructure and advertising company, she invites readers to consider Facebook anew. Contrary to the belief that nobody uses Facebook anymore, Facebook has never been more powerful. This timely book is important reading for students and scholars of media and communication as well as anyone seeking to understand the Facebook phenomenon.

You: For Sale Stuart Sumner, 2015-08-20

Everything we do online and increasingly in the real world is tracked, logged, analyzed and often packaged and sold on to the highest bidder. Every time you visit a website, use a credit card, drive on the freeway or go past a CCTV camera, you are logged and tracked. Every day billions of people choose to share their details on social media, which are then sold to advertisers. The Edward Snowden revelations that governments including those of the US and UK have been snooping on their citizens have rocked the world. But nobody seems to realize that this has already been happening for years, with firms such as Google capturing everything you type into a browser and selling it to the highest bidder. Apps take information about where you go and your contact book details, harvest them and sell them on, and people just click the EULA without caring. No one is revealing the dirty secret that is the tech firms harvesting customers' personal data and selling it for vast profits, and people are totally unaware of the dangers.

You For Sale is for anyone who is concerned about what corporate and government invasion of privacy means now and down the road. The book sets the scene by spelling out exactly what most users of the Internet and smart phones are exposing themselves to via commonly used sites and apps such as Facebook and Google, and then tells you what you can do to protect yourself. The book also covers legal and government issues as well as future trends. With interviews of leading security experts, black market data traders, law enforcement and privacy groups, **You For Sale** will help you view your personal data in a new light and understand both its value and its danger. Provides a clear picture of how companies and governments harvest and use personal data every time someone logs on. Describes exactly what these firms do with the data once they have it and what you can do to stop it. Learn about the dangers of unwittingly releasing private data to tech firms including interviews with top security experts, black market data traders, law enforcement and privacy groups. Understand the legal information and future trends that make this one of the most important issues today.

Media Audiences John L. Sullivan, 2013

Whether we are watching TV, surfing the Internet, listening to our iPods or reading a novel, we are all engaged with media as a member of an audience. Despite the widespread use of this term in our popular culture, the meaning of the audience is complex and it has undergone significant historical shifts as new forms of mediated communication have developed from print, telegraphy and radio to film, television and the Internet. **Media Audiences** explores the concept of media audiences from four broad perspectives: as victims of mass media, as market constructions, commodities as users of media and as producers, subcultures of mass media. The goal of the text is for students to be able to think critically about the role and status of media audiences in contemporary society, reflecting on their relative power in relation to institutional media.
