Forthcoming Books Rose Arny, 2002-04 Chaucer's Losers, Nintendo's Children, and Other Forays in Queer Ludonarratology Tison Pugh, 2019-12-01 Tison Pugh examines the intersection of narratology ludology and queer studies pointing to the ways in which the blurred boundaries between game and narrative provide both a textual and a metatextual space of queer narrative potential By focusing on these three distinct yet complementary areas Pugh shifts understandings of the way their play pleasure and narrative potential are interlinked Through illustrative readings of an eclectic collection of cultural artifacts from Chaucer's Canterbury Tales to Nintendo's Legend of Zelda franchise from Edward Albee's dramatic masterpiece Who's Afraid of Virginia Woolf to J.K. Rowling's Harry Potter fantasy novels Pugh offers perspectives of blissful ludonarratology sadomasochistic ludonarratology the queerness of rules the queerness of godgames and the queerness of children's questing video games Collectively these analyses present a range of interpretive strategies for uncovering the disruptive potential of gaming texts and textual games while demonstrating the wide applicability of queer ludonarratology throughout the humanities *Cheating* Mia Consalvo, 2009-08-21 A cultural history of digital gameplay that investigates a wide range of player behavior including cheating and its relationship to the game industry The widely varying experiences of players of digital games challenge the notions that there is only one correct way to play a game Some players routinely use cheat codes consult strategy guides or buy and sell in game accounts while others consider any or all of these practices off limits Meanwhile the game industry works to constrain certain readings or activities and promote certain ways of playing In *Cheating* Mia Consalvo investigates how players choose to play games and what happens when they can't always play the way they'd like She explores a broad range of player behavior including cheating alone and in groups examines the varying ways that players and industry define cheating describes how the game industry itself has helped systematize cheating and studies online cheating in context in an online ethnography of Final Fantasy XI She develops the concept of gaming capital as

a key way to understand individuals interaction with games information about games the game industry and other players Consalvo provides a cultural history of cheating in videogames looking at how the packaging and selling of such cheat enablers as cheat books GameSharks and mod chips created a cheat industry She investigates how players themselves define cheating and how their playing choices can be understood with particular attention to online cheating Finally she examines the growth of the peripheral game industries that produce information about games rather than actual games Digital games are spaces for play and experimentation the way we use and think about digital games Consalvo argues is crucially important and reflects ethical choices in gameplay and elsewhere
