

NEW WORLD NEW MIND

**"A rare book that changes people's lives,
rarer still a book that changes the world."**
— *San Francisco Chronicle*

"The world may be going to pot or up in smoke,
and all because our miserably unprepared yet
powerful brains can unleash forces beyond our
moral and political control. We shall have to
bring mind and world together, with proper
respect and understanding of both, if we are
to maintain any hope for human salvation on
a beautiful planet. This book by two great
humanists—one an expert on mind, one on the
natural world—points the way...
Let us all listen, read and act...
—Stephen Jay Gould

"If we don't act on this information,
our grandchildren may never forgive us."
— *Daniel Goleman, author
of Emotional Intelligence*

New World New Mind Moving Toward Conscious Evolution:

New World, New Mind Robert Evan Ornstein, Paul R. Ehrlich, 1989 New World New Mind Robert Evan Ornstein, Paul R. Ehrlich, 2000 There is no longer sufficient time to rely on the normal pace of cultural evolution to deal with today's dilemmas Human beings have always been the most adaptable creatures on the planet and they should be able to chart a new course for themselves Some of that charting is already being done The old mind today is being challenged and changed by many scattered efforts Can we bring these efforts together to produce a large scale program for a rapid change of mind We know what the problem is The solution is not simple to generate the social and political will to move a program of conscious evolution to the top of the human agenda The Making of the New Spirituality James A. Herrick, 2004-12-02 James A Herrick offers an intellectual history of the New Religious Synthesis examining the challenges it poses to Judeo Christian tradition demonstrating its sources and manifestations in contemporary culture and questioning its acceptance in church and society *Das Weibliche im Mann* Loren E. Pedersen, 2015-04-15 Der Psychoanalytiker Loren E Pedersen zeigt, welche immense Bedeutung die Anima das Weibliche im Mann hat und wie verhängnisvoll es für die seelische Entwicklung eines männlichen Menschen sein kann, wenn er ihr nicht die gebührende Beachtung schenkt oder sie gar verdrängt Dann kommt es zu jener einseitigen Betonung der männlichen Werte wie Rationalität Leistungsdenken Aggressivität und die weiblichen Qualitäten Sensibilität Intuition und Mitgefühl werden unterdrückt Der Mann verkümmert zum halben Menschen Wenn er jedoch lernt, die weibliche Seite seiner Seele wahrzunehmen, wird es ihm gelingen, zur wahren Stärke eines reifen, seiner selbst bewussten Menschen zu gelangen Dieser Text bezieht sich auf eine frühere Ausgabe Green Delusions Martin W. Lewis, 1992 Scholars, politicians, and activists worldwide are finally recognizing the severity of the global environmental crisis, yet serious threats to the environmental movement remain Anti environmentalists dismiss the very idea of a crisis as a mirage Much less obvious, however, is the more subtle threat masquerading under the mantle of environmentalism itself It is this threat that *Green Delusions* addresses Writing from the standpoint of a committed environmentalist, Martin W Lewis contends that many of the most devoted and strident greens, those who propose a radical environmentalism, unwittingly espouse an ill conceived doctrine that has devastating implications for the global ecosystem In this book he distinguishes the main variants of eco extremism, exposes the fallacies upon which such views ultimately flounder, and demonstrates that the policies advocated by their proponents would, if enacted, result in unequivocal ecological disaster At once polemic and prescriptive *Green Delusions* is an impassioned attempt to defend the environmental movement against extremist ideas that would lead to self defeating political strategies **Advanced Generalist Social Work Practice** David S. Derezotes, 2000 This book describes an advanced generalist approach to direct social work practice with individuals, couples, families, and groups Intervention paradigms that include psychodynamic, cognitive behavioral, communications, experiential, humanistic, existential, and transpersonal are presented as the four sources of social work *Democratic Dilemmas in the Age of*

Ecology Daniel Press, 1994 Environmental problems present democratic dilemmas The problems are so large and so often pit localities and interest groups against each other that they challenge basic democratic institutions particularly the ideal of citizen participation in society's choices In this book Daniel Press examines the conflict between environmental political thought and democratic theory and asks whether successful environmental protection is beyond the capabilities of democratic decisionmaking Press introduces the primary debate in this confrontation as a choice between political centralization and decentralization Do citizens faced with environmental crises tend to look first to a centralized leadership for solutions or do they tend to respond at a more local and grassroots level What is the role of technical expertise in this process and how does it effect public participation in these matters Do confrontations over environmental issues increase support for a more fully democratic decisionmaking process Representing social political and economic challenges to democracy these and other questions are then investigated empirically through analyses of case studies Focusing on two recent controversies in the western United States ancient forest logging in Oregon and California and hazardous waste management in California and drawing on in depth interviews with individuals involved Press clarifies the relationship between environmentalism and democracy and explores the characteristics of new democratic forms of environmental policymaking Revealing a need for a more decentralized process and increased individual and collective action in response to environmental crises *Democratic Dilemmas in the Age of Ecology* will be of interest to a wide range of audiences from scholars concerned with applications of democratic theory to activists and policymakers seeking to change or implement environmental policy

Handbook of Ecocriticism and Cultural Ecology Hubert Zapf, 2016-05-10 Ecocriticism has emerged as one of the most fascinating and rapidly growing fields of recent literary and cultural studies From its regional origins in late twentieth century Anglo American academia it has become a worldwide phenomenon which involves a decidedly transdisciplinary and transnational paradigm that promises to return a new sense of relevance to research and teaching in the humanities A distinctive feature of the present handbook in comparison with other survey volumes is the combination of ecocriticism with cultural ecology reflecting an emphasis on the cultural transformation of ecological processes and on the crucial role of literature art and other forms of cultural creativity for the evolution of societies towards sustainable futures In state of the art contributions by leading international scholars in the field this handbook maps some of the most important developments in contemporary ecocritical thought It introduces key theoretical concepts issues and directions of ecocriticism and cultural ecology and demonstrates their relevance for the analysis of texts and other cultural phenomena

Sustainability, Human Well-Being, and the Future of Education Justin W. Cook, 2018-09-17 This open access book explores the key dimensions of a future education system designed to enable individuals schools and communities to achieve the twin twenty first century challenges of sustainability and human well being For much of the twentieth century Western education systems prepared students to enter the workforce contribute to society and succeed in relatively

predictable contexts Today people are at the controls of the planet making decisions that are dramatically reshaping social economic and environmental systems at a global scale What is education s purpose in this new reality What and how must we learn now The volatility and uncertainty caused by digitalization globalization and climate change weave a common backdrop through each chapter Using case studies drawn from Finland and the US chapter authors explore various aspects of learning and education system design through the lenses of sustainability and human well being to evaluate how our understanding and practice of education must transform Using their scholarly research and experience as practitioners the authors propose new approaches to preparing learners for a new frontier of the human experience fraught with risks but full of opportunity

Descartes' Error Antonio Damasio,2005-09-27 An ambitious and meticulous foray into the nature of being The Boston Globe A landmark exploration of the relationship between emotion and reason Since Descartes famously proclaimed I think therefore I am science has often overlooked emotions as the source of a person s true being Even modern neuroscience has tended until recently to concentrate on the cognitive aspects of brain function disregarding emotions This attitude began to change with the publication of *Descartes Error* in 1995 Antonio Damasio one of the world s leading neurologists The New York Times challenged traditional ideas about the connection between emotions and rationality In this wondrously engaging book Damasio takes the reader on a journey of scientific discovery through a series of case studies demonstrating what many of us have long suspected emotions are not a luxury they are essential to rational thinking and to normal social behavior

Humanity on a Tightrope Paul R. Ehrlich,Robert E. Ornstein,2010-12-16 When we think of family we most often think of our sisters and brothers our cousins and grandparents rather than our world family or even our community connections We still identify with our differences more than our similarities unless it s convenient to do otherwise Here two seasoned authors tackle the question of family and what it means to us now and how it might change to help us address the problems that affect us all Using specific examples throughout the work they present a unique approach to what it means to belong to one human family Beginning with a consideration of how the family unit has begun to be defined by allegiances by common ties and empathy the authors then discuss the evolution of the family unit and how the us vs them mentality gave way to a way of life that separated peoples rather than brought them together They consider family values how they arose developed were perverted or perfected to suit the family unit s needs and the confusion that followed *Humanity on a Tightrope* focuses on what families and family values are and how they often create an us versus them mentality that is at the root of many of today s most crucial problems from terrorism racism and war to the failure of humanity to come to grips with potentially lethal global environmental problems The book underlines a basic element for solving the human predicament quickly spreading the domain of empathy It takes a close look at how we can do that building on the findings of both social and natural science and using tools ranging from brain imaging to the internet It explains how civilization is unlikely to persist unless many more people learn to put themselves in the shoes of others to keep society balancing on the tightrope to

sustainability a tightrope suspended over the collapse of civilization *Environment, Scarcity, and Violence* Thomas F. Homer-Dixon, 2010-07-01 The Earth's human population is expected to pass eight billion by the year 2025 while rapid growth in the global economy will spur ever increasing demands for natural resources The world will consequently face growing scarcities of such vital renewable resources as cropland fresh water and forests Thomas Homer Dixon argues in this sobering book that these environmental scarcities will have profound social consequences contributing to insurrections ethnic clashes urban unrest and other forms of civil violence especially in the developing world Homer Dixon synthesizes work from a wide range of international research projects to develop a detailed model of the sources of environmental scarcity He refers to water shortages in China population growth in sub Saharan Africa and land distribution in Mexico for example to show that scarcities stem from the degradation and depletion of renewable resources the increased demand for these resources and or their unequal distribution He shows that these scarcities can lead to deepened poverty large scale migrations sharpened social cleavages and weakened institutions And he describes the kinds of violence that can result from these social effects arguing that conflicts in Chiapas Mexico and ongoing turmoil in many African and Asian countries for instance are already partly a consequence of scarcity Homer Dixon is careful to point out that the effects of environmental scarcity are indirect and act in combination with other social political and economic stresses He also acknowledges that human ingenuity can reduce the likelihood of conflict particularly in countries with efficient markets capable states and an educated populace But he argues that the violent consequences of scarcity should not be underestimated especially when about half the world's population depends directly on local renewables for their day to day well being In the next decades he writes growing scarcities will affect billions of people with unprecedented severity and at an unparalleled scale and pace Clearly written and forcefully argued this book will become the standard work on the complex relationship between environmental scarcities and human violence **Culture and Civilization** Gabriel R. Ricci, 2013-01-23 This volume of *Culture and Civilization* focuses on cosmopolitanism the global polity and political ramifications of globalization The introduction by Gabriel R Ricci establishes context and provides an overview of the entire work Topics include the history of globalization climate change policy ecological consequences of development concepts of civilization human rights Eastern thought and economics global citizenship and travel writing Within this collection Carl J Strikwerda argues that the first era of globalization in modern times was marked by global migrations patterns Pablo Iannone's history of the Andean oil rush and its ecological consequences looks at the processes of development Brett Bowden argues that civilization entails both progress and war J Baird Callicott provides a philosophical analysis of a moral theory that accommodates spatial and temporal scales of climate change Sanjay Paul analyzes the United Nations Global Compact and Ed Chung discusses the role of economic theory in business schools Colin Butler reflects on E F Schumacher's *Buddhist Economics* while Taso Lagos relates parallel polis to the idea of global citizenship Tony Burns examines the ways in which Aristotle Hegel and Kant have been interpreted Finally

Adam Stauffer explores Charles Warren Stoddard's work *South Sea Idyls* This volume of *Culture and Civilization* the first under Ricci's editorship follows the tradition of the previous four volumes developing critical ideas intended to produce a positive intellectual climate one that is prepared to confront challenges and alert us to the opportunities for people in all fields and of all faiths of the twenty first century

The Ingenuity Gap Thomas Homer-Dixon, 2011-04-30 Is our world becoming too complex and too fast paced to manage The challenges facing human societies from international financial crises and global climate change to pandemics of tuberculosis and AIDS converge intertwine and often remain largely beyond our ken Most of us suspect that the experts don't really know what's going on and that as a species we have released forces that are neither managed nor manageable This is the ingenuity gap the term coined by Thomas Homer Dixon the critical gap between our need for practical and innovative ideas to solve complex problems and our actual supply of those ideas Homer Dixon shows us how in our complex world while poor countries are particularly vulnerable to ingenuity gaps our own rich countries are no longer immune When the gap widens political disintegration and violent upheaval can result reaching into our own economies and daily lives in subtle unforeseen ways

Subcommittee on Environment, 1992 **Empowering Public Wisdom** Tom Atlee, 2012-08-07 Lifelong activist Tom Atlee proposes innovative ways to distill the wisdom of ordinary people in order to better guide public policy In Empowering Public Wisdom Atlee recognizes currently popular forms of progressive democracy advocates such as citizen participation and voter education but suggests that what is really needed is a rethinking of the very concept of democracy Atlee advocates the use of public wisdom a collective intelligence that can be drawn upon to guide public policy and action Reaching beyond partisan politics Atlee explores how a diversity of views can be engaged around public issues in ways that generate a coherent shared voice of the people that takes most or all of the population's perspectives and needs into account Atlee's core approach is through citizen deliberative councils in which a small group of people randomly selected creates a mini public or a

microcosm of the larger population Citizen councils engage in the study of a public issue and make recommendations to public officials and the community but disband afterward when a new issue arises a new council is formed Ultimately Atlee aims even higher suggesting a possible fourth branch of government to better balance our current democratic system Combining a radical vision with practical solutions Empowering Public Wisdom provides a unique and refreshing voice in the political arena Empowering Public Wisdom is part of the EVOLVER EDITIONS Manifesto Series
