Yeomans, 2017-09-13 In business you can manage project schedules or project schedules will manage you The key to successful project scheduling is to use a tested real world process We share this process along with tools techniques templates and more And along the way we help you prepare for the PMI SP Certification Examination This book includes comprehensive information including a 150 question self test useful activities and a comprehensive glossary You can count on this book to be the primary source you need to pass the PMI SP exam the first time But if you aren't applying for formal PMI certification this book serves as a great reference to improve your overall project scheduling skills Whether you're an experienced project manager or someone leading their first work team *Passing the PMI Scheduling Professional PMI SP Certification Exam the First Time* gives you the practical tools insights and advice to manage schedules for your next project

Computational Science - ICCS 2025 Workshops Maciej Paszynski, Amanda S. Barnard, Yongjie Jessica Zhang, 2025-07-03 The 6 volume set constitutes the workshop proceedings of the 25th International Conference on Computational Science ICCS 2025 which took place in Singapore Singapore during July 7-9 2025 The 137 full papers and 32 short papers presented in these proceedings were carefully reviewed and selected from 322 submissions The papers are organized in the following topical sections Volume I Advances in high performance computational earth sciences numerical methods frameworks artificial intelligence approaches for network analysis artificial intelligence and high performance computing for advanced simulations and biomedical and bioinformatics challenges for computer science Volume II Computational health computational modeling and artificial intelligence for social systems and computational optimization modelling and simulation Volume III Computational science and AI for addressing complex and dynamic societal challenges equitably computer graphics image processing and artificial intelligence computing and data science for materials discovery and design and large language models and intelligent decision making within the digital economy Volume IV Machine learning and data assimilation for dynamical systems and multi criteria decision making methods applications and innovations Volume V Credible Multiscale modelling and simulation numerical algorithms and computer arithmetic for computational science quantum computing retrieval augmented generation and simulations of flow and transport modeling algorithms and computation Volume VI Smart systems bringing together computer vision sensor networks and artificial intelligence solving problems with uncertainty and teaching computational science *Research Methodologies, Innovations and Philosophies in Software Systems Engineering and Information Systems* Mora, Manuel, 2012-02-29 Philosophical paradigms theoretical frameworks and methodologies make up the answering and problem solving systems that define current research approaches

While there are multiple research method books the subject lacks an update and integrated source of reference for graduate courses Research Methodologies Innovations and Philosophies in Software Systems Engineering and Information Systems aims to advance scientific knowledge on research approaches used in systems engineering software engineering and information systems and to update and integrate disperse and valuable knowledge on research approaches This aims to be a collection of knowledge for PhD students research oriented faculty and instructors of graduate courses

Biomeasurement Dawn Hawkins,2014-04 Offering a student focused introduction to the use of statistics in the study of the biosciences this text looks at statistical techniques and other essential tools for bioscientists giving students the confidence to use and further explore the key techniques for themselves *Electrical Power Unit Commitment* Yuping Huang,Panos M. Pardalos,Qipeng P. Zheng,2017-01-13 This volume in the SpringerBriefs in Energy series offers a systematic review of unit commitment UC problems in electrical power generation It updates texts written in the late 1990s and early 2000s by including the fundamentals of both UC and state of the art modeling as well as solution algorithms and highlighting stochastic models and mixed integer programming techniques The UC problems are mostly formulated as mixed integer linear programs although there are many variants A number of algorithms have been developed for or applied to UC problems including dynamic programming Lagrangian relaxation general mixed integer programming algorithms and Benders decomposition In addition the book discusses the recent trends in solving UC problems especially stochastic programming models and advanced techniques to handle large numbers of integer decision variables due to scenario propagation Exploring the Unknown, Volume VII, NASA SP-2008-4407, 2008, *,2009 NASA SP-7500 United States. National Aeronautics and Space Administration,1978 Food Security, Poverty and Nutrition Policy Analysis Suresh Babu,Prabuddha Sanyal,2009-04-06 Food Security Poverty and Nutrition Analysis provides essential insights into the evaluative techniques necessary for creating appropriate and effective policies and programs to address these worldwide issues Food scientists and nutritionists will use this important information presented in a conceptual framework and through case studies for exploring representative problems identifying and implementing appropriate methods of measurement and analysis understanding examples of policy applications and gaining valuable insight into the multidisciplinary requirements of successful implementation This book provides core information in a format that provides not only the concept behind the method but real world applications giving the reader valuable practical knowledge Identify proper analysis method apply to available data develop appropriate policy Demonstrates analytical techniques using real world scenario application to illustrate approaches for accurate evaluation improving understanding of practical application development Tests reader comprehension of the statistical and analytical understanding vital to the creation of solutions for food insecurity malnutrition and poverty related nutrition issues using hands on exercises **Proceedings of the Sixth International Colloquium on Differential Equations** D. International Colloquium on Differential Equations verf gbar *13th International Conference on Computational Intelligence in Security for Information Systems (CISIS 2020)* Álvaro Herrero, Carlos Cambra, Daniel Urda, Javier Sedano, Héctor Quintián, Emilio Corchado, 2020-08-27 This book contains accepted papers presented at CISIS 2020 held in the beautiful and historic city of Burgos Spain in September 2020 The aim of the CISIS 2020 conference is to offer a meeting opportunity for academic and industry related researchers belonging to the various vast communities of computational intelligence information security and data mining The need for intelligent flexible behaviour by large complex systems especially in mission critical domains is intended to be the catalyst and the aggregation stimulus for the overall event After a thorough peer review process the CISIS 2020 International Program Committee selected 43 papers which are published in these conference proceedings achieving an acceptance rate of 28% Due to the COVID 19 outbreak the CISIS 2020 edition was blended combining on site and on line participation In this relevant edition a special emphasis was put on the organization of five special sessions related to relevant topics as Fake News Detection and Prevention Mathematical Methods and Models in Cybersecurity Measurements for a Dynamic Cyber Risk Assessment Cybersecurity in a Hybrid Quantum World Anomaly Intrusion Detection and From the least to the least cryptographic and data analytics solutions to fulfil least minimum privilege and endorse least minimum effort in information systems The selection of papers was extremely rigorous in order to maintain the high quality of the conference and we would like to thank the members of the Program Committees for their hard work in the reviewing process This is a crucial process to the creation of a high standard conference and the CISIS conference would not exist without their help **Key Methods in Geography** Nicholas Clifford, Gill

Valentine, 2003-06-06 Key Methods in Geography is an introduction for undergraduates to the principal methodological issues involved in the collection analysis and presentation of geographical information It provides an accessible primer which will be used by students as a reference throughout their degree on all issues from research design to presentation A unique feature of the book is that it provides definitions of terms from both human geography and physical geography Organized into four parts Getting Started in Geographical Research Data Collection in Human Geography Data Collection in Physical Geography Analyzing and Representing Geographical Data Each chapter is comprised of a short definition a summary of the principal arguments a substantive 5 000 word discussion the use of real life examples and annotated notes for further reading The teaching of research methods is integral in all geography courses Key Methods in Geography identifies the key analytical and observational strategies with which all geography undergraduates should be conversant **The**

Mathematica GuideBook for Numerics Michael Trott, 2006-10-27 Mathematica is today s most advanced technical computing system featuring a rich programming environment two and three dimensional graphics capabilities and hundreds of sophisticated powerful programming and mathematical functions using state of the art algorithms Combined with a user friendly interface and a complete mathematical typesetting system Mathematica offers an intuitive easy to handle

environment of great power and utility The Mathematica GuideBook for Numerics text and code fully tailored for Mathematica 5.1 concentrates on Mathematica's numerical mathematics capabilities The available types of arithmetic machine high precision and interval are introduced discussed and put to use Fundamental numerical operations such as compiling programs fast Fourier transforms minimization numerical solution of equations ordinary partial differential equations are analyzed in detail and are applied to a large number of examples in the main text and solutions to the exercises

Systems of Insight for Digital Transformation: Using IBM Operational Decision Manager Advanced and Predictive Analytics Whei-Jen Chen, Rajeev Kamath, Alexander Kelly, Hector H. Diaz Lopez, Matthew Roberts, Yee Pin Yheng, IBM Redbooks, 2015-12-03 Systems of record SORs are engines that generate value for your business Systems of engagement SOEs are always evolving and generating new customer-centric experiences and new opportunities to capitalize on the value in the systems of record The highest value is gained when systems of record and systems of engagement are brought together to deliver insight Systems of insight SOIs monitor and analyze what is going on with various behaviors in the systems of engagement and information being stored or transacted in the systems of record SOIs seek new opportunities risks and operational behavior that needs to be reported or have action taken to optimize business outcomes Systems of insight are at the core of the Digital Experience which tries to derive insights from the enormous amount of data generated by automated processes and customer interactions Systems of Insight can also provide the ability to apply analytics and rules to real-time data as it flows within throughout and beyond the enterprise applications databases mobile social Internet of Things to gain the wanted insight Deriving this insight is a key step toward being able to make the best decisions and take the most appropriate actions Examples of such actions are to improve the number of satisfied clients identify clients at risk of leaving and incentivize them to stay loyal identify patterns of risk or fraudulent behavior and take action to minimize it as early as possible and detect patterns of behavior in operational systems and transportation that lead to failures delays and maintenance and take early action to minimize risks and costs IBM Operational Decision Manager is a decision management platform that provides capabilities that support both event-driven insight patterns and business rule-driven scenarios It also can easily be used in combination with other IBM Analytics solutions as the detailed examples will show IBM Operational Decision Manager Advanced along with complementary IBM software offerings that also provide capability for systems of insight provides a way to deliver the greatest value to your customers and your business IBM Operational Decision Manager Advanced brings together data from different sources to recognize meaningful trends and patterns It empowers business users to define manage and automate repeatable operational decisions As a result organizations can create and shape customer-centric business moments This IBM Redbooks publication explains the key concepts of systems of insight and how to implement a system of insight solution with examples It is intended for IT architects and professionals who are responsible for implementing a systems of insights solution requiring event-based context pattern detection and deterministic decision

Advances and Applications of DSMT for Information Fusion. Collected Works, Volume 5 Florentin Smarandache, Jean Dezert, Alben Tchamova, This fifth volume on Advances and Applications of DSMT for Information Fusion collects theoretical and applied contributions of researchers working in different fields of applications and in mathematics and is available in open access. The collected contributions of this volume have either been published or presented after disseminating the fourth volume in 2015 available at fs.unm.edu/DSMTbook4.pdf or www.onera.fr/sites/default/files/2015-DSMTBook4.pdf in international conferences, seminars, workshops, and journals, or they are new. The contributions of each part of this volume are chronologically ordered. First Part of this book presents some theoretical advances on DSMT dealing mainly with modified Proportional Conflict Redistribution Rules, PCR of combination with degree of intersection coarsening techniques, interval calculus for PCR thanks to set inversion via interval analysis, SIVIA, rough set classifiers, canonical decomposition of dichotomous belief functions, fast PCR fusion, fast inter-criteria analysis with PCR and improved PCR5 and PCR6 rules preserving the quasi-neutrality of quasi-vacuous belief assignment in the fusion of sources of evidence with their Matlab codes. Because more applications of DSMT have emerged in the past years since the apparition of the fourth book of DSMT in 2015, the second part of this volume is about selected applications of DSMT mainly in building change detection, object recognition, quality of data association in tracking, perception in robotics, risk assessment for torrent protection, and multi-criteria decision making, multi-modal image fusion, coarsening techniques, recommender system, levee characterization and assessment, human heading perception, trust assessment, robotics, biometrics, failure detection, GPS systems, inter-criteria analysis, group decision, human activity recognition, storm prediction, data association for autonomous vehicles, identification of maritime vessels, fusion of support vector machines, SVM, Silx, Furtif, RUST code library for information fusion including PCR rules and network for ship classification. Finally, the third part presents interesting contributions related to belief functions in general, published or presented along the years since 2015. These contributions are related with decision making under uncertainty, belief approximations, probability transformations, new distances between belief functions, non-classical multi-criteria decision making problems with belief functions, generalization of Bayes theorem, image processing, data association, entropy and cross entropy measures, fuzzy evidence numbers, negator of belief, mass, human activity recognition, information fusion for breast cancer therapy, imbalanced data classification, and hybrid techniques mixing deep learning with belief functions as well.

Her War: Episodes 6 to 10 Rebecca Rosengrave, Circa WWII and the acid of Japanese conflict is eating its way closer to the defenceless Australian shores. With the men away on the European frontline, there remains one option: fight like a girl. Her War is a ten-episode screenplay based on historical events involving Australian women. While a select few joined the services including the Australian Women's Army Service, an even larger number enlisted in the forgotten fourth service: Australian Women's Land Army. Underpaid, underappreciated, and overworked, these women faced an even bigger
