Cities of Medieval Iran ,2020-06-11 Cities of Medieval Iran brings together studies in urban geography archaeology and history of medieval Iranian cities spanning the Islamic period until ca 1500 but also the pre Islamic situation The cities and their inhabitants take centre stage they are not just the places where something else happened Urban actors are given priority over external factors The contributions take a long term perspective and thus take the interaction between urban centres and their hinterland into account Many contributions come from history or archaeology but new disciplines are also methodologically integrated into the study of medieval cities such as the arts of the book lexicography geomorphology and digital instruments Contributors include Denise Aigle Mehrdad Amanat Jean Aubin Richard W Bulliet Jamsheed K Choksy David Durand Gu dy Etienne de la Vaissi re Majid Montazer Mahdi Roy P Mottahedeh J rgen Paul Rocco Rante Sarah Savant Ali Shojai Esfahani Donald Whitcomb and Daniel Zakrzewski *Icons of Space* Jelena Bogdanović,2021-07-26 Icons of Space Advances in Hierotopy brings together important scholars of Byzantine religion art and architecture to honour the work of renowned art historian Alexei Lidov As well as his numerous publications Lidov is well known for developing the concept of hierotopy an innovative approach for studying the creation of sacred spaces Hierotopy and the related concepts of spatial icons and image paradigms emphasize fundamental questions about icons including what defines them as structures spaces and experiences Chapters in this volume engage with the overarching theme of icons of space by employing contrasting and complementing methods of hierotopy with more traditional approaches such as iconography Examinations of icons have traditionally been positioned within strictly historical theological socio economic political and art history domains but this volume poses epistemological questions about the creation of sacred spaces that are instead inclusive of multi layered iconic ideas and the lived experiences of the creators and beholders of such spaces This book contributes to image theory and theories of architecture and sacred space Simultaneously it moves beyond colonial studies that predominantly focus on questions of religion and politics as expressions of privileged knowledge and power This book will appeal to scholars and students of Byzantine history as well as those interested in hierotopy and art history Santo Antão David Salomoni,Luana Giurgevich,Henrique Leitão,2025-06-12 The volume delves into the multifaceted history of Lisbon s Jesuit College of Santo Ant o tracing its evolution from its establishment to the eventual suppression of the Society of Jesus This scholarly work examines an array of themes including the college s innovative pedagogical practices its architectural developments and its significant contributions to the preservation of a rich literary heritage Moreover the volume situates the institution within broader social and scientific context **Nexus Network Journal** ,2010 **Nexus Network Journal 11,2** Kim Williams,2010-10-24 The title of this issue of the Nexus Network Journal Architecture Mathematics and Structure is deliberately ambiguous At first glance it might seem to indicate the relationship between what buildings look like and how they stand up This is indeed one aspect of what we are concerned with here But on a deeper level the fundamental concept of

structure is what connects architecture to mathematics Both architecture and mathematics are highly structured formal systems expressed through a symbolic language For architecture the generating structure might be geometrical musical modular or fractal Once we understand the nature of the structure underlying the design we are able to read the meaning inherent in the architectural forms The papers in this issue all explore themes of structure in different ways **Nexus**
