Nice Fossil Capital Steam Power Global Warming:

Fossil Capital Andreas Malm, 2016-01-12 The more we know about the catastrophic implications of climate change the more fossil fuels we burn How did we end up in this mess In this masterful new history Andreas Malm claims it all began in Britain with the rise of steam power But why did manufacturers turn from traditional sources of power notably water mills to an engine fired by coal Contrary to established views steam offered neither cheaper nor more abundant energy but rather superior control of subordinate labour Animated by fossil fuels capital could concentrate production at the most profitable sites and during the most convenient hours as it continues to do today Sweeping from nineteenth century Manchester to the emissions explosion in China from the original triumph of coal to the stalled shift to renewables this study hones in on the burning heart of capital and demonstrates in unprecedented depth that turning down the heat will mean a radical overthrow of the current economic order

Das Klima der Geschichte im planetarischen Zeitalter Dipesh Chakrabarty, 2022-04-11 Vom Globus zum Planeten Der indische Historiker Dipesh Chakrabarty z hlt zu den international einflussreichsten Wissenschaftlern die sich in den letzten Jahren mit der Bedeutung des Klimawandels auseinandergesetzt haben Der Klimawandel so argumentiert er stellt unsere althergebrachten Vorstellungen von Geschichte Moderne und Globalisierung grundlegend in Frage Die Aufgabe besteht daher darin diese Konzepte auf den Pr fstand zu stellen und berhaupt die Geistes und Sozialwissenschaften mit neuen Ideen und Begriffen zu versorgen damit sie den Herausforderungen des Anthropoz ns gewachsen sind In seinem Buch taucht Chakrabarty tief ein in Geschichte und Philosophie und stellt k hne berlegungen dar ber an wie das menschliche Denken und Leben zuk nftig zu gestalten ist Insbesondere erkl rt er dass wir zu einem besseren Verst ndnis sowohl unserer Herkunft als auch unserer Zukunft nur dann gelangen wenn wir in der Lage sind uns selbst aus zwei Perspektiven gleichzeitig zu betrachten einer globalen und einer planetarischen wobei letztere den Menschen absichtlich dezentriert Erst auf diese Weise wird es m glich in geologischen Zeitr umen zu denken sowie ein angemessenes Bild von der menschlichen Handlungsf higkeit zu gewinnen Angesichts der drohenden Naturkatastrophen ist es daf r h chste Zeit

The Great Awakening Anna Grear, 2020 As we enter a time of climate catastrophe worsening inequality and collapsing market state systems can human societies transcend the old dysfunctional paradigms and build the world anew There are many signs of hope In *The Great Awakening* twelve cutting edge activists scholars and change makers probe the deep roots of our current predicament while reflecting on the social DNA for a post capitalist future We learn about seed sharing in agriculture blockchain technologies for networked collaboration cosmocal peer production of houses and vehicles creative hacks on law and new ways of thinking and enacting a rich collaborative future This surge of creativity is propelled by the social practices of commoning new modes of life for creating and sharing wealth in fair minded ecologically respectful ways It is clear that the multiple entangled crises produced by neoliberal capitalism cannot be resolved by existing political and legal institutions which are imploding under the weight of their own contradictions Present and future needs

can be met by systems that go beyond the market and state With experiments and struggle a growing pluriverse of commoners from Europe and the US to the Global South and cyberspace are demonstrating some fundamentally new ways of thinking being and acting This ontological shift of perspective is making new worlds possible **Denken in großen**

Bildern Andreas Sommer,2025-06-04 Wir leben gegenwärtig im Anthropozän das uns als Polykrise gesamtgesellschaftlich herausfordert Es bedarf bergreifender Perspektiven und Reflexionsebenen wenn Lernende an die Gewordenheit der Gegenwart mit ihren globalen Problemlagen herangeführt werden sollen Vor diesem Hintergrund muss im Geschichtsunterricht ein makrogeschichtlicher Blick auf den Menschen als Kulturwesen geworfen werden Andreas Sommer geht der Frage nach inwiefern bergreifenden kulturenthropologischen Reflexionsebenen beim historischen Lernen verstärkte Aufmerksamkeit zukommen sollte Er untersucht inwieweit sich das Denken in großen Bildern im schulischen Geschichtsunterricht aber auch in der universitären Lehre nutzbar machen lässt Mit seiner Studie zeigt er auf welche positiven Effekte mittels makrohistorischer Perspektiven angebahnt werden können und wie historisches Denken zum Verstehen von Welt beiträgt **The Long Heat** Andreas Malm,Wim Carton,2025-10-07 The world is crossing the 1.5°C global warming limit perhaps exceeding 2°C soon after What is to be done when these boundaries set by the Paris Agreement have been passed In the overshoot era schemes proliferate for muscular adaptation or for new technologies to turn the heat down at a later date by removing CO₂ from the air or blocking sunlight Such technologies are by no means safe they come with immense risks and provide an excuse for those who would prefer to avoid limiting emissions in the present But do they also hold out some potential Can the catastrophe be reversed masked or simply adapted to once it is a fact Or will any such roundabout measures simply make things worse The Long Heat maps the new front lines in the struggle for a liveable planet and insists on the climate revolution long overdue In the end no technology can absolve us of responsibility for our planet and each other **Living with Precariousness** Christina Lee,Susan Leong,2023-06-15 Precariousness has become a defining experience in contemporary society as an inescapable condition and state of being Living with Precariousness presents a spectrum of timely case studies that explore precarious existences at individual collective and structural levels and as manifested through space and the body These range from the plight of asylum seekers to the tiny house movement as a response to affordable housing crises from the global impacts of climate change to the daily challenges of living with a chronic illness This multidisciplinary book illustrates the pervasiveness of precarity but furthermore shows how those entanglements with other agents human or otherwise that put us at risk are also the connections that make living with and through precariousness endurable **Borderlands of Theological Education** Joshua B. Davis,Deirdre Good,2022-10-03 Traditional patterns of educating and training clergy face not only crises of increasing cost and declining enrollment but also a crisis of identity since at present it is the academy not the church that shapes formation for ministry This collection of essays outlines a history and a new vision of the church as the primary location of ministerial formation for the future of

theological education Humans, Animals, and U.S. Society in the Long Nineteenth Century: A Documentary History
Dominik Ohrem, 2025-11-18 Volume IV comprises two sections dealing respectively with the development of pet culture and its evolution as a cultural institution over the course of the long nineteenth century and with the variegated presence of domesticated and feralised animals in U S cities Closely tied to the antebellum rise of the American middle class family and the sentimentalisation of certain human animal relationships by the turn of the twentieth century American petkeeping had become the target of an expansive industry that offered everything from gourmet pet foods and fashionable accessories to healthcare and boarding services This proliferation of companion animals also had a significant impact on urban life Besides walking sitting or lying on sidewalks and being sold in city stores and on street corners in cases of abandonment the animals swelled an ever increasing population of canine and feline strays Together with horses pigs cows chicken and urban wildlife these animals fundamentally shaped the routines rhythms and general experience of nineteenth century urban life for human city dwellers *The Conservation Revolution* Bram Büscher, Robert Fletcher, 2020-02-11 Conservation needs a revolution This is the only way it can contribute to the drastic transformations needed to come to a truly sustainable model of development The good news is that conservation is ready for revolution Heated debates about the rise of the Anthropocene and the current sixth extinction crisis demonstrate an urgent need and desire to move beyond mainstream approaches Yet the conservation community is deeply divided over where to go from here Some want to place half earth into protected areas Others want to move away from parks to focus on unexpected and new natures Many believe conservation requires full integration into capitalist production processes Building on a razor sharp critique of current conservation proposals and their contradictions Bscher and Fletcher argue that the Anthropocene challenge demands something bigger better and bolder Something truly revolutionary They propose convivial conservation as the way forward This approach goes beyond protected areas and faith in markets to incorporate the needs of humans and nonhumans within integrated and just landscapes Theoretically astute and practically relevant *The Conservation Revolution* offers a manifesto for conservation in the 21st century a clarion call that cannot be ignored **Trauma and the Discourse of Climate Change** Lee Zimmerman, 2020-03-24 The more the global north has learned about the existential threat of climate change the faster it has emitted greenhouse gases into the atmosphere In *Trauma and the Discourse of Climate Change* Lee Zimmerman thinks about why this is by examining how climate change has been discursively constructed tracing how the ways we talk and write about climate change have worked to normalize a generalized bipartisan denialism more profound than that of the overt denialists Suggesting that we understand that normalized denial as a form of cultural trauma the book explores how the dominant ways of figuring knowledge about global warming disarticulate that knowledge from the trauma those figurations both represent and reproduce and by which they remain inhabited and haunted Its early chapters consider that process in representations of climate change across a range of disciplines and throughout the public sphere including Al Gore s *An Inconvenient Truth*

Barack Obama's speeches and climate plans and the 2015 Paris Agreement. Later chapters focus on how literary representations especially for the most part participate in such disarticulations and on how in grappling with the representational difficulties at the climate crisis's heart some works of fiction among them Cormac McCarthy's *The Road* and Russell Hoban's *Riddley Walker* work against that normalized rhetorical violence. The book closes with a meditation centered on the dream of the burning child. Freud sketches in *The Interpretation of Dreams* highlighting the existential stakes of the ways we think and write about the climate. *Trauma and the Discourse of Climate Change* aims to offer an unfamiliar place from which to engage the astonishing quiescence of our ecocidal present. This book will be essential reading for academics and students of psychoanalysis, environmental humanities, trauma studies, literature and environmental studies as well as activists and others drawn to thinking about the climate crisis.

[Environmental Regulation and the History of Capitalism](#)
Sandra Bott, Sabine Pitteloud, Janick Marina Schaufelbuehl, 2025-04-28. This edited collection examines the historical role of business actors in climate and environmental governance since the 1970s. Through a compilation of recent evidence-based historical research, this book unveils the origins of contemporary challenges in regulating environmental pollution. With original case studies, it offers a nuanced understanding of the environmental counter-offensive orchestrated by business leaders, associations, and think tanks post 1972, following the United Nations' pivotal Stockholm Conference on the Human Environment. Readers are presented with insights into the historical maneuvers of business entities aimed at mitigating regulatory risks, co-creating expertise, and framing the environmental debate. From revealing the tactics employed by various business actors to exploring the emergence of market-driven environmentalism, this volume offers a comprehensive exploration of the intricate dynamics shaping environmental policy. By contextualizing specificities and complexities, it enriches contemporary narratives on business influence and power dynamics within global capitalism. This book primarily caters to scholars across diverse historical disciplines, including business history, international relations, environmental history, and the history of capitalism. Additionally, it holds relevance for social scientists studying contemporary issues, policymakers grappling with environmental challenges, and those seeking a deeper understanding of the historical dimensions of climate governance. [Climate Obstruction](#)
Kristoffer Ekberg, Bernhard Forchtner, Martin Hultman, Kirsti M. Jylhä, 2022-12-30. In *Climate Obstruction: How Denial, Delay, and Inaction are Heating the Planet*, Kristoffer Ekberg, Bernhard Forchtner, Martin Hultman, and Kirsti Jylhä bring together crucial insights from environmental history, sociology, media and communication studies, and psychology to help us understand why we are failing to take necessary measures to avert the unfolding climate crisis. They do so by examining the variety of ways in which meaningful climate action has been obstructed. This ranges from denial of the scientific evidence for human-induced climate change and its policy consequences to seemingly sincere acknowledgement of scientific evidence while nevertheless

delaying meaningful climate action The authors also consider all those actions by which often well meaning individuals and collectives unintentionally hamper climate action In doing so this book maps out arguments and strategies that have been used to counter environmental protection and regulation since the 1960s by first and foremost corporations supported by conservative actors but also far right ones as well as ordinary citizens This timely and accessible book provides tools and lessons to understand identify and call out such arguments and strategies and points to actions and systemic and cultural changes needed to avert or at least mitigate the climate crisis

Creatures of the Air J.Q. Davies,2023-08-11

An account of nineteenth century music in Atlantic worlds told through the history of the art s elemental medium the air Often experienced as universal and incorporeal music seems an innocent art form The air the very medium by which music constitutes itself shares with music a claim to invisibility In *Creatures of the Air* J Q Davies interrogates these claims tracing the history of music s elemental media system in nineteenth century Atlantic worlds He posits that air is a poetic domain and music is an art of that domain From West Central African ngombi harps to the European J S Bach revival music expressed elemental truths in the nineteenth century *Creatures of the Air* tells these truths through stories about suffocation and breathing architecture and environmental design climate strife and racial turmoil Contributing to elemental media studies the energy humanities and colonial histories Davies shows how music no longer just an innocent luxury is implicated in the struggle for control over air as a precious natural resource What emerges is a complex political ecology of the global nineteenth century and beyond

Energy in America Rebecca K. Wright,2025-04-29 How a distinctly American way of thinking about energy shaped US culture and society from the Progressive Era to the atomic bomb In *Moral Energy in America* Rebecca K. Wright offers an illuminating exploration of how the concept of energy shaped American thought culture and politics throughout the first half of the twentieth century This essential history traces how politicians sociologists geographers urban planners economists and intellectuals adopted the idea of energy to bolster their social programs and visions of the future through distinctive energy imaginaries Energy was not a stable concept in the period and it appealed to writers and advocates across the political and cultural spectrum While medical practitioners and social workers interwove energy into discussions of race immigration youth and crime mainstream political campaigns appealed to the public by drawing energy into political rhetoric Wright positions energy at the heart of key intellectual debates of the period such as the Bourne Dewey confrontation over America's role in World War I and the rise of technocratic ideas that envisioned energy as a new metric for societal progress In a thirty

year era that shook the foundations of American democracy a period punctuated by the Great Depression the rise of communism and fascism abroad two world wars and the atomic bomb energy became a key metaphor through which to understand major transformations in American society Wright demonstrates how energy's many meanings transcended material and scientific definitions to influence everything from racial theories to economic policies and ultimately played a pivotal role in molding the American moral landscape

Keywords in Radical Geography The Antipode Editorial Collective, 2019-06-10 The online version of *Keywords in Radical Geography* Antipode at 50 is free to download here Alternatively print copies can be purchased for just GB 7 US 10 here To celebrate Antipode's 50th anniversary we've brought together 50 short keyword essays by a range of scholars at varying career stages who all in some way have some kind of affinity with Antipode's radical geographical project The entries in this volume are diverse eclectic and to an extent random however they all speak to our discipline's past present and future in exciting and suggestive ways Contributors have taken unusual or novel terms concepts or sets of ideas important to their research and their essays discuss them in relation to radical and critical geography's histories current condition and possible future directions This fractal playful and provocative intervention in the field stands as a fitting testimony to the role that Antipode has played in the generation of radical geographical engagement with the world

The States of the Earth Mohamed Amer Meziane, 2024-04-09 An extraordinary book Mohamed Amer Meziane's breathtaking analysis of the making of fossil states opens to a new genre of history writing where the very layers of earth's riches are at its center Ann Laura Stoler author of *Carnal Knowledge and Imperial Power Along the Archival Grain* How the disenchantment of empire led to climate change While industrial states competed to colonize Asia and Africa in the nineteenth century conversion to Christianity was replaced by a civilizing mission This new secular impetus strode hand in hand with racial capitalism in the age of empires a terrestrial paradise was to be achieved through accumulation and the ravaging of nature Far from a defence of religion *The States of the Earth* argues that phenomena such as evangelism and political Islam are best understood as products of empire and secularization In a world where material technology was considered divine religious and secular forces both tried to achieve Heaven on Earth by destroying Earth itself

Ecomobilities Michael W. Pesses, 2021-10-19 *Ecomobilities* examines the ideological connections between automobiles the environment and the end of the world focusing on the car's inseparability from modern life Through popular films addressing both mobilities and environmental disasters *Ecomobilities* reveals how American automobility has influenced responses to warming temperatures and shifting ecosystems
