Outstanding Dissertations in Bilingual Education Recognized by the National Advisory Council on Bilingual Education, 1979 United States. National Advisory Council on Bilingual Education,1980 Reading Randomised Controlled Trials Robert Savage,Amy Fox ,Anneka Dawson,Helen Gray,Clare Huxley,2025-03-03

In early 2021 22 the Flexible Phonics reading intervention a large scale randomised controlled trial took place in 118 schools in England and involved nearly 3 000 children This study aimed to provide valuable insights into the success of largely school based education trials The Flexible Phonics trial proved to be not only an important experiment in improving children s literacy but a case study in which the methodology of single randomised controlled trials in education can be considered Reading Randomised Controlled Trials investigates the complexities of conducting randomised controlled trials in the field of education and how they can be seen as a cultural activity The book emphasises the human operations decision making and actions that drive such trials which are often overlooked in published reports Through the case study of Flexible Phonics the book highlights the key differences between scaled educational trials and other types of trials such as pharmaceutical trials The additional focus on early childhood literacy is of significant educational importance particularly in the context of UK school partial closures in 2020 and 2021 during the Covid 19 pandemic Reading Randomised Controlled Trials is ultimately a unique resource on the implementation of randomised controlled trials in authentic school contexts and for the sustained improvement of practice in education

Learning to be Literate Margaret M Clark,2016-03-10 Winner of the prestigious UK Literacy Association Academic Book Award for 2015 in its original edition this fully revised edition of Learning to be Literate uniquely analyses research into literacy from the 1960s through to 2015 with some surprising conclusions Margaret Clark explores the argument that young children growing up in a literate environment are forming hypotheses about the print around them including environmental print television computer games and mobile phones In a class where no child can yet read there is a wide range of understanding with regards to concepts of print and the critical features of written language While to any literate adult the relationship between spoken and written language may be obvious young children have to be helped to discover it This persuasive argument demonstrates the value of research in order to make informed policy decisions about children s literacy development Accessible and succinct Professor Clark s writing brings into sharp focus the processes involved in becoming

literate The effect on practice of many recent government policies she claims run counter to these insights The key five thematic sections are backed up with case studies throughout and include Insights from Literacy Research 1960s to 1980s Young Literacy Learners how we can help them Curriculum Developments and Literacy Policies 1988 to 1997 a comparison between England and Scotland Synthetic Phonics and Literacy Learning government policy in England 2006 to 2015 Interpretations of Literacy in the Twenty first Century

Nancy L. Cecil,2017-05-12 Striking a Balance explores a comprehensive program of early literacy instruction through a balanced approach to reading and writing for both enjoyment and information The fifth edition retains the special features that adopters have come to appreciate classroom vignettes discussion questions field based activities a student website and study guide This latest edition offers expanded content on differentiating instruction for diverse learners including working with English Language Learners and students with special needs Also new to this edition is greater coverage on integrating state standards with early literacy instruction The book s practical approach fundamentally demonstrates how children develop authentic literacy skills through a combination of direct strategy instruction and motivating contexts **Reading Across International Boundaries** Roger Openshaw,Janet Soler,2007-06-01 Reading Across International Boundaries edited by Roger Openshaw and Janet Soler clearly demonstrates these broader characteristics of debates about the teaching of reading It sets the educational issues firmly in the context of the social cultural and political dynamics that inform and animate them and give them their meaning It does so by setting out to understand their historical and comparative dimensions Establishing the historical context highlights the origins and also the longevity of the problems and conflicts that are now widely familiar The comparative approach also gives purchase on the wide range of approaches taken to these issues in nations around the world More than this however this collection takes us into the realm of international influences It underlines how debates in this area are not simply national but are international and global in their scale Moreover this is the case not only in relation to the broad fabric of policy debate but also in the everyday struggles of pupils parents and teachers in schools classrooms and homes Such an agenda is unsettling and provocative It has the potential to challenge received opinion to hustle preconceptions It may also propose alternative visions for the improvement of teaching in this area that might be taken up and taken seriously in different localities or even more broadly Most of all it enables us to enrich and broaden our understanding of the learning and the teaching of reading at a time when awareness and vision are sorely needed This collection of articles by leading scholars based in several different countries will be a significant contribution to the research field but also a major resource when put to good use by policy makers and practitioners as it should surely be

Language, Memory, and Cognition in Infancy and Early Childhood Janette B. Benson,Marshall M. Haith,2010-05-22 Language cognition and memory are traditionally studied together prior to a researcher specializing in any one area They are studied together initially because much of the development of one can affect the development of the others Most books available now either tend to be extremely broad in the areas of all infant development including physical and social development or specialize in cognitive development language acquisition or memory Rarely do you find all three together despite the fact that they all relate to each other This volume consists of focused articles from the authoritative Encyclopedia

of Infant and Early Childhood Development and specifically targets the ages 0-3. Providing summary overviews of basic and cutting edge research coverage includes attention assessment, bilingualism, categorization skills, critical periods, learning disabilities, reasoning, speech development, etc. This collection of articles provides an essential, affordable reference for researchers, graduate students, and clinicians interested in cognitive development, language development, and memory, as well as those developmental psychologists interested in all aspects of development. Focused content on age 0-3 saves time searching for and wading through lit on full age range for developmentally relevant info. Concise, understandable, and authoritative, easier to comprehend for immediate applicability in research.
