to international health and our sustainability targets dietary change strategies are a possible solution to overcome this
problem Dietary changes towards more sustainable diets globally are projected to continue in the coming decades and at the
same time are expected to have a positive impact on human health Our current global challenge is to encourage and support
healthy and balanced diets for nearly 10 billion people by 2050 More recently we have seen the increasing popularity of
innovative and sustainable concepts including plant based ingredients or ingredients from other alternative sources e g algae
single cell protein and insects To encourage the continued popularity of such ingredients we must develop sustainable
healthy and balanced diets that incorporate and imitate the sensory experience taste and consistency of familiar products
like animal products for example Dietary changes to healthier and predominantly plant based diets will help us to meet our
global environmental targets but these changes need to overcome potential economic corruption infrastructure political
