

Did You Know This — About — Babies?

Babies can remember the songs they hear on repeat while inside the womb.

75% of nutrients in a baby's meals go to the brain's development in the first two years.

A baby's vision can only detect black, white, and shades of gray at birth.

Unlike adults, babies have 300 bones, some of which fuse and become one to make 206 bones.

Babies are heavy sleepers and may sleep for 14-20 hours daily in the first few weeks.

Babies breathe much faster than adults, with 40-60 breaths per minute while awake.

Child Rearing in America Neal Halfon,Kathryn Taaffe McLearn,Mark A. Schuster,2002-07-08 This rich and well researched volume comes in the wake of

intense national interest in young children. Leading scholars from diverse disciplines use relevant data from the Commonwealth Survey of Parents with Young Children to present new information about the lives of families with very young children: how parents spend their time with their children, the economic and social challenges they face, and the supports they receive to improve their children's health and development. Such a broad portrait based on nationally representative data has not been attempted before. Drawing on their extensive expertise and research in the issues being addressed, the authors examine and elaborate on the survey findings. They synthesize the major themes emerging from the data and consider the family, community, and policy implications to frame and interpret the results. What emerges is a picture of the complex forces that influence families and child rearing in the early years.

All the Facts James W. Cortada, 2016. A history of the role of information in the United States since 1870.

Working with Parents, Carers and Families in the Early Years Teresa Wilson, 2015-07-24. Parents have a crucial role in supporting children's learning, development, and well-being. The act of forming effective partnerships with families and carers is a key feature of the Early Years Foundation Stage. Achieving this takes time, reflective practice, skill, and a solid understanding of the barriers that can impede forming effective working relationships with parents. This guide offers an informed and comprehensive framework for working with parents, drawing on the latest evidence and containing practical advice from practitioners and parents to support sound partnership practice. Full of examples and activities for training and resources to support practice across a wide range of settings, it focuses on key areas such as working with parents of different aged children, the development of strategies to support the relationship, the barriers to partnership working, including cultural differences and working with hard-to-reach families, setting up home and setting visits, creating parent-friendly environments. Including case studies and questions for reflective practice, this book will be ideal for Early Years students on Foundation Degrees, Childhood Studies Courses, and those training to become Early Years teachers, as well as Early Years practitioners and managers responsible for staff training.
