

sion of feminist ideas and scholarship in the 1960s and early 1970s. How did academics and community activists work together, if they did, to achieve it? What can we learn from feminists' earlier coalition-building experiences that will be useful in the future, including what to do when we find ourselves, as Tobias describes the predicament, "in the uncomfortable position" of agreeing with or being on the same side of an issue as a conservative, nonfeminist group?

Finally, this is an interesting book that contains the author's personal experiences and insights—not in such volume as to bore us, just enough to set us thinking about our own experiences at a particular time. It is not an easy read because it contains a great deal of information and analysis and gives us no more than brief outlines for the future when we may want a well-worked-out plan and road map. But, it is not merely worthwhile; it seems likely to become a valuable historical record for future feminists.

*Community Activism and Feminist Politics: Organizing Across Race, Class and Gender.* Edited by Nancy A. Naples. New York: Routledge, 1998, 411 pp., \$75 (hardbound), \$23.99 (paper).

This book tackles a subject that has frustrated feminist organizers since feminism began: how to make common cause with their sisters when race and class divide them. The case studies of the successes and failures that are reported in this book detail the issues, conflicts, and innovations that trouble and invigorate women who work together for social change; they help us remember that White middle-class women did not invent feminist activism. The authors focus on local grassroots efforts in which they have sometimes been catalytic leaders, sometimes participants, and sometimes observers. The excellent conceptual and summary chapters by the editor at the beginning and the end tie the stories together into a cohesive whole and pose important questions for continuing study.

Naples cites her own working-class background and experience as the impetus for assembling the volume to deal with the fact that

Coverage of the Clinton Lewinsky saga followed in a long trail of media exposures of the more personal details of the lives of public figures Many commentators have seen stories like this and TV shows like Jerry Springer s as evidence of a decline in the standards of the mass media This increasing interest in private lives and the falling off of coverage of serious news is often described as tabloidization The essays in this book are the first serious scholarly studies of what is going on and what its implications are Reality it turns out is much more complex than some of the laments suggest As the contributors show this is not just a U S problem but is repeated in country after country and it is not certain that the media anywhere are getting more tabloid What is more there is no consensus about whether tabloidization is just dumbing down or whether it is a necessary tactic for the mass media to engage with new audiences who do not have the news habit *Tabloid Tales* will be of interest to students and scholars in journalism mass communication political science and cultural and media studies      **The**

**The Battle over**

Marriage Leigh Moscovitz, 2013-11-15 Over the past decade the controversial issue of gay marriage has emerged as a primary battle in the culture wars and a definitive social issue of our time The subject moved to the forefront of mainstream public debate in 2004 when San Francisco Mayor Gavin Newsom began authorizing same sex marriage licenses and it has remained in the forefront through three presidential campaigns and numerous state ballot initiatives In this thorough analysis Leigh Moscovitz examines how prominent news outlets presented this issue from 2003 to 2012 a time when intense news coverage focused unprecedented attention on gay and lesbian life During this time LGBT rights leaders sought to harness the power of media to advocate for marriage equality and to reform their community's public image Building on in depth interviews with activists and a comprehensive longitudinal study of news stories Moscovitz investigates these leaders' aims and how their frames, tactics and messages evolved over time In the end media coverage of the gay marriage debate both aided and undermined the cause Media exposure gave activists a platform to discuss gay and lesbian families But it also triggered an upsurge in opposing responses and pressured activists to depict gay life in a way calculated to appeal to heterosexual audiences Ultimately *The Battle over Marriage* reveals both the promises and the limitations of commercial media as a route to social change

SAGE Handbook of Feminist Theory Mary Evans, Clare Hemmings, Marsha Henry, Hazel Johnstone, Sumi Madhok, Ania Plomien, Sadie Wearing, 2014-08-12 At no point in recorded history has there been an absence of intense and heated discussion about the subject of how to conduct relations between women and men This Handbook provides a comprehensive guide to these omnipresent issues and debates mapping the present and future of thinking about feminist theory The chapters gathered here present the state of the art in scholarship in the field covering Epistemology and marginality Literary visual and cultural representations Sexuality Macro and microeconomics of gender Conflict and peace The most important consensus in this volume is that a central organizing tenet of feminism is its willingness to examine the ways in which gender and relations between women and men have been and are organized The authors bring a shared commitment to the critical appraisal of gender relations as well as a recognition that to think theoretically is not to detach concerns from lived experience but to extend the possibilities of understanding With this focus on theory and theorizing about the world in which we live this Handbook asks us across all disciplines and situations to abandon our taken for granted assumptions about the world and interrogate both the origin and the implications of our ideas about gender relations and feminism It is an essential reference work for advanced students and academics not only of feminist theory but of gender and sexuality across the humanities and social sciences

Weeping Britannia Thomas Dixon, 2015-09-10 There is a persistent myth about the British that we are a nation of stoics with stiff upper lips repressed emotions and inactive lachrymal glands Weeping Britannia the first history of crying in Britain comprehensively debunks this myth Far from being a persistent element in the national character the notion of the British stiff upper lip was in fact the product of a relatively brief and militaristic period of our past from about 1870 to 1945 In earlier times we were a nation of proficient sometimes virtuosic moral weepers To illustrate this perhaps surprising fact Thomas Dixon charts six centuries of weeping Britons and theories about them from the medieval mystic Margery Kempe in the early fifteenth century to Paul Gascoigne's famous tears in the semi finals of the 1990 World Cup In between the book includes the tears of some of the most influential figures in British history from Oliver Cromwell to Margaret Thatcher not forgetting George III Queen Victoria Charles Darwin and Winston Churchill along the way But the history of weeping in Britain is not simply one of famous tear stained individuals These tearful micro histories all contribute to a bigger picture of changing emotional ideas and styles over the centuries touching on many other fascinating areas of our history For instance the book also investigates the histories of painting literature theatre music and the cinema to discover how and why people have been moved to tears by the arts from the sentimental paintings and novels of the eighteenth century and the romantic music of the nineteenth to Hollywood weepies expressionist art and pop music in the

twentieth century Weeping Britannia is simultaneously a museum of tears and a philosophical handbook using history to shed new light on the changing nature of Britishness over time as well as the ever shifting ways in which we express and understand our emotional lives The story that emerges is one in which a previously rich religious and cultural history of producing and interpreting tears was almost completely erased by the rise of a stoical and repressed British empire in the late nineteenth century Those forgotten philosophies of tears and feeling can now be rediscovered In the process readers might perhaps come to view their own tears in a different light as something more than mere emotional incontinence

*Class and Contemporary British Culture* A. Biressi, H. Nunn, 2013-04-23 How does culture articulate frame organise and produce stories about social class and class difference What do these stories tell us about contemporary models of success failure struggle and aspiration How have class based labels been revived or newly minted to categorise the insiders and outsiders of the new age of austerity Drawing on examples from the 1980s to the present day this book investigates the changing landscape of class and reveals how it has become populated by a host of classed figures including Essex Man and Essex Girl the squeezed middle the sharp elbowed middle class the feral underclass the white working class the undeserving poor selfish baby boomers and others Overall the book argues that social class although complicated and highly contested remains a valid and fruitful route into understanding how contemporary British culture articulates social distinction and social difference and the significant costs and investments at stake for all involved **Advertising, Sex, and**

**Post-Socialism** Elza Ibroscheva, 2013-06-20 Advertising Sex and Post Socialism explores the role of advertising and the consumption it promotes in changing cultural perceptions of sex and femininity across the Balkan region Elza Ibroscheva theorizes how the marketing of gender identities that has taken place in the years of post socialist transition has fundamentally affected the social economic and political positioning of women Advertising is one of the major factories of cultural signification and as such serves as the most ubiquitous vessel of global norms of gendered selves In addition advertising serves as a literacy tool for learning the grammar of consumption studying the ideologies of femininity and sex before and after the collapse of the socialist project as well as the prevailing portrayals of femininity in advertising in present day Bulgaria This book provides a revealing look at the mechanisms of how post socialist norms of sexual behavior are being engendered and what role media play in this transformative process
