Nice Book Development Economics Practice Alain Janvry:

Development Economics Alain de Janvry, Elisabeth Sadoulet, 2021-05-30 This second edition of *Development Economics Theory and Practice* continues to provide students and practitioners with the perspectives and tools they need to think analytically and critically about the current major economic development issues in the world. Alain de Janvry and Elisabeth Sadoulet identify seven key dimensions of development: growth, poverty, vulnerability, inequality, basic needs, sustainability, and quality of life, and use them to structure the contents of the text. The book gives a historical perspective on the evolution of thought in development. It uses theory and empirical analysis to present readers with a full picture of how development works, how its successes and failures can be assessed, and how alternatives can be introduced. The authors demonstrate how diagnostics, design of programs and policies, and impact evaluation can be used to seek new solutions to the suffering and violence caused by development failures. In the second edition, more attention has been given to ongoing developments such as pursuit of the Sustainable Development Goals, continuously rising global and national inequality, health as a domestic and international public good, cash transfers for social protection, carbon trading for sustainability. This text is fully engaged with the most cutting edge research in the field and equips readers with analytical tools for impact evaluation of development programs and policies, illustrated with numerous examples. It is underpinned throughout by a wealth of student friendly features including case studies, quantitative problem sets, end of chapter questions, and extensive references. Excel and Stata exercises are available as digital supplements for students and instructors. This unique text is ideal for those taking courses in development economics, economic growth, and development policy, and will provide an excellent foundation for those wishing to pursue careers in development.

Economic Development Stuart R. Lynn, 2003 This text for a first course in economic development covers key development topics such as human capital, technology, the environment, and population growth. Sections cover concepts and measurement of economic development, resources for development, productive sectors, and the state and the international system.

Retopia: Creating New Spaces of Possibility Dirk Hoyer, 2023-05-22 *Retopia* tells the story of social innovation in times of crisis and through its cross disciplinary narrative it goes beyond existing forms of future anticipation and maps out a practice based approach to the creation of new realities. It explores how new imaginaries, social experiments, and laboratories of societies can create spaces of possibilities, revalidate the peripheries, and create new forms of social coherence. The peripheral regions in Europe are facing a crisis: a triangle of depopulation, the rise of the useless class, and outdated social welfare systems. It is a crisis of political imaginaries and a lack of inspiring political stories. In response to this, the book specifically focuses on the concept of *retopia*, the idea of creating inclusive spaces of social innovation that encourage active participation. Through the creation of relocalized societies with a high degree of autonomy in leftover spaces such as Sicily, Western Latvia, or Northern Bulgaria, *retopian* redevelopment schemes offer new perspectives on ruined spaces. *Retopia* uncovers the common links and limitations of

utopian studies future studies degrowth narratology the commons and political geography Retopia Creating New Spaces of Possibility is an articulation of the potentialities of social innovation political imaginaries and future images provoking a stimulating discussion among scholars and students in the fields of Politics and Future and Anticipation Studies
