Medievalism David Matthews,2015 An accessibly written survey of the origins and growth of the discipline of medievalism studies The field known as medievalism studies concerns the life of the Middle Ages after the Middle Ages Originating some thirty years ago it examines reinventions and reworkings of the medieval from the Reformation to postmodernity from Bale and Leland to HBO s Game of Thrones But what exactly is it An offshoot of medieval studies A version of reception studies Or a new form of cultural studies Can such a diverse field claim coherence Should it be housed in departments of English or History or should it always be interdisciplinary In responding to such questions the author traces the history of medievalism from its earliest appearances in the sixteenth century to the present day across a range of examples drawn from the spheres of literature art architecture music and more He identifies two major modes the grotesque and the romantic and focuses on key phases of the development of medievalism in Europe the Reformation the late eighteenth century and above all the period between 1815 and 1850 which he argues represents the zenith of medievalist cultural production He also contends that the 1840s were medievalism s one moment of canonicity in several European cultures at once After that medievalism became a minority form rarely marked with cultural prestige though always pervasive and influential Medievalism a Critical History scrutinises several key categories space time and selfhood and traces the impact of medievalism on each It will be the essential guide to a complex and still evolving field of inquiry David Matthews is Professor of Medieval and Medievalism Studies at the University of Manchester

Becoming by Beholding Lanta Davis,2024-07-30 A must read for anyone interested in the relationship of imagination to Christian devotion Christianity Today Christianity Today 2025 Book Award Finalist Culture Poetry and the Arts Southwestern Journal of Theology 2024 Book Award Honorable Mention Discipleship Spiritual Formation

We tend to think of the imagination as the realm of fantasy and makebelieve. However, the imagination shapes our vision of reality in that the stories, symbols, and places that capture our hearts become part of who we are. *Becoming by Beholding* restores the imagination to its central role in spiritual formation by recovering key works from the Christian tradition, enabling us to experience the formative power of the imagination for ourselves. It also revives the art of fashioning the soul as an essential aspect of Christian spiritual formation and character development. Lanta Davis explains that many of the problems at the heart of the Christian church today, such as nationalism, consumerism, and partisan politics, stem from a crisis of the imagination. She encourages us to reorient our gaze from diseased cultural forms and fix our eyes instead on works from the historic Christian imaginative tradition that better reflect the love, joy, and wonder of the gospel. *Becoming by Beholding* will appeal to professors and students in spiritual formation, worldview, and theology and arts courses, as well as to all Christian readers interested in the intersection of theology and art. Each chapter introduces a different work of the Christian imagination: icons, sacred architecture, imaginative prayer, bestiaries, and personifications of the virtues and vices. The book also includes a twenty-page insert featuring numerous full-color images.

Educational Bilingualism Natalia A. Gunina, Radislav P. Millrood, 2019-08-18. This volume focuses on the recent trend in English language pedagogy of educational bilingualism, that is, teaching English language contents and cultures in bilingual lessons. It draws on the critical revision of the monolingual tradition of language instruction rooted in the outdated direct method, once powerful at the turn of the 20th century. The realities of education are that the English language is spreading to foreign lands, circulating alongside native tongues, functioning as a universal communication tool for multinational groups or individuals and emerging as a global language in education. This book proves the hypothesis that in the epoch of information breakthroughs and global migration, the value of English in education lies in it being the key to innovative knowledge. This leads to its integration with the learners' own language, providing alternative sources of information and marking cultural self-identity.

The Popular & the Canonical David Johnson, 2005. This volume ranges from the Second World War to the postmodern, considering issues of the popular and the competing criteria by which literature has been judged in the later twentieth century. As well as tracing the transition from modernism to postmodernism, the authors guide students through debates around the pleasures of the popular and the question of interrelations between mass and high cultures. Drawing further upon issues of value and function raised in Aestheticism and Modernism, *Debating Twentieth Century Literature 1900-1960* examines contemporary literary prizes and the activity of judgement involved in English Studies. This text can be used alongside the other books in the series for a complete course on twentieth-century literature or
