New Frontiers of Slavery Dale W. Tomich, 2016-02-03 Essays challenging conventional understandings of the slave economy of the nineteenth century The essays presented in New Frontiers of Slavery represent new analytical and interpretive approaches to the crisis of Atlantic slavery during the nineteenth century By treating slavery within the framework of the modern world economy they call attention to new zones of slave production that were formed as part of processes of global economic and political restructuring Chapters by a group of international historians economists and sociologists examine both the global dynamics of the new slavery and various aspects of economy society and master slave relations in the new zones They emphasize the ways in which certain slave regimes particularly in Cuba and Brazil were formed as specific local responses to global processes industrialization urbanization market integration the formation of national states and the emergence of liberal ideologies and institutions These essays thus challenge conventional understandings of slavery which often regard it as incompatible with modernity Slavery in the British Empire and Its Legacy in the Modern World Stephen Cushion, 2025-06-05 Reveals that the institution of slavery was anchored in the same exploitative capitalist system which remains in place today Slavery in the British Empire and its Legacy in the Modern World by Stephen Cushion situates the crime of enslavement within the business practices that place profit before people The institution of slavery entailed a unique combination of exploitation and expropriation anchored in patterns of conspicuous consumption by the wealthy and intertwined with the textile food agriculture construction transportation infrastructure and insurance industries It was floated by the same banking and commodity trading systems that still remain today The exploitation of enslaved labor stimulated capitalist expansion during and after the bloody reign of the British Empire at the cost of war inter imperialist rivalry Indigenous genocide and the murderous suppression of the rights of the enslaved And as Cushion argues many of the direst problems still facing the world from horrific economic inequality to rampant environmental decline have their origins in the institution of slavery Correcting these wrongs will cost money Perversely there is no shortage of funds in the coffers of the institutions which perpetrated them Neither Anglo governments nor businesses have properly addressed their role Ultimately Slavery in the British Empire and its Legacy in the Modern World goes beyond cataloguing past wrongs to engaging with the legacies of slavery spotlighting above all the defiant response of those it wronged as they call for reparations and more *Handbuch Geschichte der Sklaverei* Michael Zeuske, 2019-05-20 Michael Zeuske hat sein Standardwerk f r die zweite Auflage komplett bearbeitet und aktualisiert sowie deutlich erweitert Die Geschichte der Sklaverei wird in diesem Handbuch erstmalig in globalgeschichtlicher Perspektive systematisch dargestellt Ausgangspunkt ist ein Verstandnis von Sklaverei als Kapitalisierung menschlicher Kr per Analysiert werden die unterschiedlichsten Formen Typen und Entwicklungsepochen Plateaus von Sklavereien und Menschenhandelssystemen auf allen Kontinenten Ozeanen und Meeren in ihrer jeweiligen Benennung und ihrem historisch kulturellen Kontext Auf breiter

Nietzsche's Political Economy Dmitri G. Safronov, 2023-08-21 Safronov's Nietzsche's Political Economy is a pioneering appraisal of Nietzsche's critique of industrial culture and its unfolding crisis. The author contends that Nietzsche remains unique in conceptualizing the upheavals of modern political economy in terms of the crisis of its governing values. Nietzsche scrutinises the norms which not only preside over the unfathomable build up in debt, the proliferation of meaningless impersonal slavery and the rise of increasingly repressive social control systems but inevitably set these precarious tendencies of modern political economy on a collision course liable to culminate in an unprecedented human and environmental catastrophe. Safronov explores the core themes of Nietzsche's political economy: debt, slavery and the division of labour with reference to the influential views of Adam Smith and Karl Marx as well as against the backdrop of the Long Depression 1873-1896, the first truly international crisis of industrial capitalism during which most of Nietzsche's work was completed. In Nietzsche's assessment, modern political economy is predicated on the valuations that diminish humankind's prospects and harm the planet's future by consistently enfeebling the present as long as there is profit to be made from it. Nietzsche's critical insight which challenges the most fundamental tenet of modern economics and finance is that in order to build a stronger and intrinsically more valuable future in lieu of simply speculating on it as though the liberal Promised Land could descend upon us like the manna from heaven at the wave of an invisible hand of the market, it is necessary to walk from the future we dare to envisage resolutely back to the present we inhabit to determine what demands achieving such a vision would impose upon us instead of embellishing the here and now by cynically discounting the future to the net value of the present while disparaging, disowning and rewriting the past to unburden ourselves of its troubling legacy as we continue to frivolously squander its capital to the alluring tunes of the sirens who in the marketplace sing to us of the future. The enabling mechanism for changing our valuing perspectives, Nietzsche tells us, lies dormant in us and it must be unlocked before it is too late.

Rethinking Atlantic Empire Scott Eastman, Stephen Jacobson, 2021-06-11 In recent years the historiography of nineteenth century Spain and Latin America has been invigorated by interdisciplinary engagement with scholars working on topics such as empire, slavery, abolition, race, identity and captivity. No scholar better exemplified these developments than Christopher Schmidt-Nowara, a specialist on Spain and its Caribbean colonies in Cuba and Puerto Rico. A brilliant career was cut short in 2015 when he died at the age of 48. *Rethinking Atlantic Empire* takes Schmidt-Nowara's work as a point of departure, charting scholarly paths that move past reductive national narratives and embrace transnational approaches to the entangled empires of the Atlantic world.

How slave emancipation transformed capitalism in the United States and Brazil In the nineteenth century the United States and Brazil were the largest slave societies in the Western world The former enslaved approximately four million people the latter nearly two million Slavery was integral to the production of agricultural commodities for the global market and governing elites feared the system s demise would ruin their countries Yet when slavery ended in the United States and Brazil in 1865 and 1888 respectively what resulted was immediate and continuous economic progress In American Mirror Roberto Saba investigates how American and Brazilian reformers worked together to ensure that slave emancipation would advance the interests of capital Saba explores the methods through which antislavery reformers fostered capitalist development in a transnational context From the 1850s to the 1880s this coalition of Americans and Brazilians which included diplomats engineers entrepreneurs journalists merchants missionaries planters politicians scientists and students among others consolidated wage labor as the dominant production system in their countries These reformers were not romantic humanitarians but cosmopolitan modernizers who worked together to promote labor saving machinery new transportation technology scientific management and technical education They successfully used such innovations to improve production and increase trade Challenging commonly held ideas about slavery and its demise in the Western Hemisphere American Mirror illustrates the crucial role of slave emancipation in the making of capitalism **Global Agricultural Workers from the 17th to the 21st Century**,2022-12-19 Agricultural workers have long been underrepresented in labour history This volume aims to change this by bringing together a collection of studies on the largest group of the global work force The contributions cover the period from the early modern to the present a period when the emergence and consolidation of capitalism has transformed rural areas all over the globe Three questions have guided the approach and the structure of this

volume First how and why have peasant families managed to survive under conditions of advancing commercialisation and industrialisation Second why have coercive labour relations been so persistent in the agricultural sector and third what was the role of states in the recruitment of agricultural workers Contributors are Elise van Nederveen Meerkerk Josef Ehmer Katherine Jellison Juan Carmona James Simpson Sophie Elpers Debojyoti Das Lozaan Khumbah Karl Heinz Arenz Leida Fernandez Prieto Rachel Kurian Rafael Marquese Bruno Gabriel Witzel de Souza Rog rio Naques Faleiros Alessandro Stanziani Alexander Keese Dina Bolokan and Janina Puder *A History of All Nations, from the Earlier Periods to the Present Time*, 1851 *A History of All Nations* Samuel Griswold Goodrich, 1855 *The Weight of Whiteness* Alison Bailey, 2021-02-23 Check your privilege is not a request for a simple favor It asks white people to consider the painful dimensions of what they have been socialized to ignore Alison Bailey's *The Weight of Whiteness: A Feminist Engagement with Privilege, Race, and Ignorance* examines how whiteness misshapes our humanity measuring the weight of whiteness in terms of its costs and losses to collective humanity People of color feel the weight of whiteness daily The resistant habits of whiteness and its attendant privileges however make it difficult for white people to feel the damage White people are more comfortable thinking about white supremacy in terms of what privilege does for them rather than feeling what it does to them The first half of the book focuses on the overexposed side of white privilege the side that works to make the invisible and intangible structures of power more visible and tangible Bailey discusses the importance of understanding privileges intersectionally the ignorance preserving habits of white talk and how privilege and ignorance circulate in educational settings The second part invites white readers to explore the underexposed side of white dominance the weightless side that they would rather not feel The final chapters are powerfully autobiographical Bailey engages readers with a deeply personal account of what it means to hold space with the painful weight of whiteness in her own life She also offers a moving account of medicinal genealogies which helps to engage the weight she inherits from her settler colonial ancestors The book illustrates how the gravitational pull of white ignorance and comfort are stronger than the clean pain required for collective liberation The stakes are high Failure to hold the weight of whiteness ensures that white people will continue to blow the weight of historical trauma through communities of color **The National Magazine; A Monthly Journal of American History**, 1889 *History of All Nations ...* Samuel Griswold Goodrich, 1854 *The Oxford Handbook of American Indian History* Frederick E.
