The Bloomsbury Handbook of the Anthropology of Sound Holger Schulze, 2020-12-10 The Bloomsbury Handbook of the Anthropology of Sound presents the key subjects and approaches of anthropological research into sound cultures What are the common characteristics as well as the inconsistencies of living with and around sound in everyday life This question drives research in this interdisciplinary area of sound studies it propels each main chapter of this handbook into a thoroughly different world of listening experiencing receiving sensing dreaming naming desiring and crafting sound This handbook is composed of six sections sonic artifacts sounds and the body habitat and sound sonic desires sounds and machines and overarching sensologies The individual chapters explore exemplary research objects and put them in the context of methodological approaches historical predecessors research practices and contemporary research gaps This volume offers therefore one of the broadest most detailed and instructive overviews on current research in this area of sensory anthropology

Pivot Will Page, 2021-04-01 A stunning new insight into how the most crucial lesson you can learn in today's challenging business environment is how to change the fundamentals of what you do rather than carry on fighting a battle that is already lost The near destruction of the music industry at the hands of online piracy and its subsequent recovery on the backs of digital streaming platforms is more than just the biggest story of disruption and reinvention of the digital age It is also a trove of insights on how to confront the metamorphosis we are all facing in dealing with the Covid 19 era as accelerating tech and economic changes reshape our work our play and our very minds Will Page Spotify's first chief

economist extrapolates music's journey into eight guiding principles for pivoting through the ubiquitous disruption in nearly all industries. Expect the unexpected with transferable lessons coming from Starbucks, Tupperware, and even Groucho Marx. The notion of Tarzan Economics ties these principles together, a framework for recognising and acting on disruption by letting go of the old vine and grabbing onto the new. Page joyfully brings these insights to life and provides a guide for knowing not just how to grab the new vine but when. He assesses the new dynamics of the long tail, identifies friends and foes in the battle for scarce attention, and provides a practical tool for discovering the right role for each of us to succeed in this new modern world. As we emerge from the unprecedented disruption of a global pandemic, Tarzan Economics shows all of us individuals, organisations, and institutions that if the vine we are holding onto is withering, we can have confidence to reach out for a new one in 2022 and beyond.

Digital Uprising Francis B. Nyamnjoh, 2024-11-14. In the dystopian nation of Mimboland, President Longstay's tyrannical reign has crumbled, leaving a nation scarred but hopeful. His own daughter, Libert, spearheaded the digital revolution that brought him down, leading the decentralised Liquid Army and an unlikely alliance of Lovebots and sentient nanobots. Now Libert grapples with the complexities of rebuilding a society from the ashes of her father's oppression. But the nanobots, once instruments of liberation, whisper a seductive promise of control, blurring the lines between creator and creation. Can Libert harness their power for good, or will she succumb to the allure of absolute authority?

Digital Uprising: The Flower of Freedom in Mimboland is a thrilling tale of revolution and resilience, exploring the delicate balance between freedom and control in a world where technology reigns supreme. It will challenge your assumptions, ignite your imagination, and leave you questioning the very nature of freedom in a technologically advanced world.

Optimizing Power & Reliability in Mobile Computing with DVFS Somdip

Dey, 2023-05-10 Low power mobile computing systems such as smartphones and wearables have become an integral part of our daily lives and are used in various ways to enhance our daily lives. Majority of modern mobile computing systems are powered by multi-processor System on a Chip (MPSoC) where multiple processing elements are utilized on a single chip. Given the fact that these devices are battery operated most of the times, thus have limited power supply and the key challenges include catering for performance while reducing the power consumption. Moreover, the reliability in terms of lifespan of these devices are also affected by the peak thermal behaviour on the device which retrospectively also makes such devices vulnerable to temperature side channel attack. This book is concerned with performing Dynamic Voltage and Frequency Scaling (DVFS) on different processing elements such as CPU, GPU and memory unit such as RAM to address the aforementioned challenges. Firstly, we design a Computer Vision based machine learning technique to classify applications automatically into different categories of workload such that DVFS could be performed on the CPU to reduce the power consumption of the device while executing the application. Secondly, we develop a reinforcement learning based agent to perform DVFS on CPU and GPU while considering the user's interaction with such devices to optimize power consumption and thermal behaviour. Next, we develop a heuristic based automated agent to perform DVFS on CPU, GPU and RAM to optimize the same while executing an application. Finally, we explored the effect of DVFS on CPUs leading to vulnerabilities against temperature side channel attack and hence we also designed a methodology to secure against such attack while improving the reliability in terms of lifespan of such devices. This book is based on the doctoral thesis titled Novel DVFS Methodologies For Power Efficient Mobile MPSoC. Cite Dey Somdip 2023 Novel DVFS Methodologies For Power Efficient Mobile MPSoC Doctoral thesis University of Essex.

Reaping the Benefits of Globalisation and the Welfare State Sigurd Næss-Schmidt, 2023-06-23 This book focuses on a question that has attracted substantial attention in recent years is globalisation leading to more inequality notably in advanced economies The consensus view is largely yes fx supported by leading international organisations such as the OECD and IMF In this book the author challenges the robustness of these claims The purpose is straightforward First a too simple reading on the effects of globalisation may lead to the wrong policy answers such as erecting barriers to trade even when it clearly benefits consumers As importantly it may also distract attention from addressing the clear and observable challenges many countries are facing notably economic activities being increasingly concentrated in the most prosperous areas and educational systems failing to provide the work force with the skills to succeed in the labour market Arguably these very domestic policy failures are key contributors to the emerging economic and political tensions in many OECD countries with global trade playing a real minor role The book also draws some policy conclusions Notably what should international economic regulation focus on notably in the domain of trade related policies and what can largely be delivered at local level even well below the national level
