Making Money Peet van Biljon, Alexandra Lajoux, 2020-01-20 How much do you really know about money Everyone uses it but few know how it really works Most books about money focus on specific aspects This book breaks through the usual silos to present money as a broad social technology that serves the current needs of society It reviews the latest developments in financial technology including cryptocurrency blockchain and the prospect of a cashless future and clears up many misconceptions in the process Starting with a very brief history the authors provide insights on how money is made why money has value and what can change its value how central banks treasuries foreign exchange lending and blockchain work why you may be trading against robots and privacy and security issues in an increasingly cashless society that will change our lives While written for a broad audience this book is also essential reading for students entering courses in the area of business finance or money and banking
