Deepseek Prompts Engineering: Hannah Brooks, 2025-08-11 DeepSeek Prompt Engineering Unlock the full potential of artificial intelligence by mastering the most powerful skill of the AI era prompt engineering In a world where language is the gateway to intelligent systems knowing how to speak to models like DeepSeek is no longer optional it's essential This book is your definitive guide to navigating the evolving landscape of prompt creation optimization and innovation with DeepSeek at your side Inside This Book You'll Discover The foundational structure of effective prompts and how syntax semantics and structure shape outcomes The key differences and use cases for zero shot vs few shot prompting How to craft domain specific prompts tailored for healthcare law education and beyond Role based strategies to fine tune tone control output and simulate expert personas Multimodal prompting techniques that leverage text image and contextual input Templates and frameworks that standardize quality across use cases How to test evaluate and continuously refine prompts for optimal performance From solving coding challenges to generating creative content and automating business tasks you'll see firsthand how prompt engineering is transforming the way we work and think Explore real use cases mitigate hallucinations handle biases and anticipate the future of adaptive memory based and ethical prompting systems The future of intelligent interaction isn't hidden in the code it's embedded in the prompt The words you choose shape the results you get With this book as your guide you'll never look at AI the same way again Scroll Up and Grab Your Copy Today **Learn**

Generative AI with PyTorch Mark Liu, 2025-01-28 Learn how generative AI works by building your very own models that can write coherent text create realistic images and even make lifelike music Learn Generative AI with PyTorch teaches the underlying mechanics of generative AI by building working AI models from scratch Throughout you'll use the intuitive PyTorch framework that's instantly familiar to anyone who's worked with Python data tools Along the way you'll master the fundamentals of Generative Adversarial Networks GANs Transformers Large Language Models LLMs variational autoencoders diffusion models LangChain and more In Learn Generative AI with PyTorch you'll build these amazing models A simple English to French translator A text generating model as powerful as GPT-2 A diffusion model that produces realistic flower images Music generators using GANs and Transformers An image style transfer model A zero shot know it all agent The generative AI projects you create use the same underlying techniques and technologies as full scale models like GPT-4 and Stable Diffusion You don't need to be a machine learning expert you can get started with just some basic Python programming skills About the technology Transformers Generative Adversarial Networks GANs diffusion models LLMs and other powerful deep learning patterns have radically changed the way we manipulate text images and sound Generative AI may seem like magic at first but with a little Python the PyTorch framework and some practice you can build interesting and useful models that will train and run on your laptop This book shows you how About the book Learn Generative AI with PyTorch introduces the underlying mechanics of generative AI by helping you build your own working AI models You'll begin

by creating simple images using a GAN and then progress to writing a language translation transformer line by line As you work through the fun and fascinating projects you ll train models to create anime images write like Hemingway make music like Mozart and more You just need Python and a few machine learning basics to get started You ll learn the rest as you go What s inside Build an English to French translator Create a text generation LLM Train a diffusion model to produce high resolution images Music generators using GANs and Transformers About the reader Examples use simple Python No deep learning experience required About the author Mark Liu is the founding director of the Master of Science in Finance program at the University of Kentucky The technical editor on this book was Emmanuel Maggiori **Williams' Basic**

Fundamentals of Radiation Oncology Hasan Murshed, 2024-06-20 Fundamentals of Radiation Oncology Physical Biological and Clinical Aspects Fourth Edition is written by a team of renowned experts This book is a must have resource for anyone practicing radiation oncology From basic principles to more advanced planning and delivery of radiation therapy to treat cancer this book is a go to resource for mastering the art and science of radiation oncology Recent advances in SRS SBRT proton therapy and immunotherapy New chapters on adaptive radiotherapy and artificial intelligence in radiation therapy IMRT and IGRT techniques are covered in depth in all clinical chapters Latest landmark studies provide evidence based rationale for recommended treatments Radiation treatment toxicity and its management Weekly Commercial News, 1979 Innovations and Dynamics in Photonics and Electronics Vijaya Katti, Milind Pande, Pravin Jadhav, Aavishkar Katti, 2025-03-30 The fields of photonics and electronics are at the heart of technological innovation driving progress across industries and shaping the future of human connectivity automation and sustainability The book is a comprehensive exploration of the critical developments economic strategies and cutting edge technologies revolutionizing these domains This book delves into India's unique position in the global electronics landscape emphasizing its export strength and comparative advantages It examines the dynamic role of investments economic models and incentives in building self reliance and boosting domestic manufacturing The importance of supply chain management in fostering technological growth is discussed along with the transformative potential of adopting circular economy principles for sustainability The book also explores the synergy between photonics electronics and artificial intelligence highlighting advancements in machine learning that are redefining possibilities in the field From optimizing manufacturing processes to harnessing AI driven solutions this book offers insights into how technology is reshaping the world of electronics and photonics Whether you are an academic a

policymaker an industry professional or a student of technology and innovation this book provides a rich foundation for understanding the dynamic forces shaping the future of photonics and electronics in India and beyond **Treatment of Cancer** Pat Price,Karol Sikora,2025-03-28 This successful text is a comprehensive guide to modern cancer treatments that aims to give clinician and student alike the framework for an integrated approach to patient care including radiotherapy chemotherapy and surgery Information is presented in tables and charts for easy assimilation and clear algorithms for patient pathways are included to make decisions straightforward while allowing for sound clinical judgement

Computational Intelligence Techniques for Green Smart Cities Mohamed Lahby,Ala Al-Fuqaha,Yassine Maleh,2022-04-22 This book contains high quality and original research on computational intelligence for green smart cities research In recent years the use of smart city technology has rapidly increased through the successful development and deployment of Internet of Things IoT architectures The citizens quality of life has been improved in several sensitive areas of the city such as transportation buildings health care education environment and security thanks to these technological advances Computational intelligence techniques and algorithms enable a computational analysis of enormous data sets to reveal patterns that recur This information is used to inform and improve decision making at the municipal level to build smart computational intelligence techniques and sustainable cities for their citizens Machine intelligence allows us to identify trends patterns The smart city could better integrate its transportation network for example By offering a better public transportation network adapted to the demand we could reduce personal vehicles and energy consumption A smart city could use models to predict the consequences of a change such as pedestrianizing a street or adding a bike lane A city can even create a 3D digital twin to test hypothetical projects This book comprises many state of the art contributions from scientists and practitioners working in machine intelligence and green smart cities It aspires to provide a relevant reference for students researchers engineers and professionals working in this area or those interested in grasping its diverse facets and exploring the latest advances in machine intelligence for green and sustainable smart city applications **Recent Advances and the Future Generation of Neuroinformatics Infrastructure** Xi Cheng,Daniel R. Weinberger,Daniel Marcus,John Van Horn,Venkata Satyanand Mattay,Qian Luo,2015-12-11 The huge volume of multi modal neuroimaging data across different neuroscience communities has posed a daunting challenge to traditional methods of data sharing data archiving data processing and data analysis Neuroinformatics plays a crucial role in creating advanced methodologies and tools for the handling of varied and heterogeneous datasets in order to better understand the structure and function of the brain These tools and methodologies not only enhance data collection analysis integration interpretation modeling and dissemination of data but also promote data sharing and collaboration This Neuroinformatics Research Topic aims to summarize the state of art of the current achievements and explores the directions for the future generation of neuroinformatics infrastructure The publications present solutions for data archiving data processing and workflow data mining and system integration

methodologies Some of the systems presented are large in scale geographically distributed and already have a well established user community Some discuss opportunities and methodologies that facilitate large scale parallel data processing tasks under a heterogeneous computational environment We wish to stimulate on going discussions at the level of the neuroinformatics infrastructure including the common challenges new technologies of maximum benefit key features of next generation infrastructure etc We have asked leading research groups from different research areas of neuroscience neuroimaging to provide their thoughts on the development of a state of the art and highly efficient neuroinformatics infrastructure Such discussions will inspire and help guide the development of a state of the art highly efficient neuroinformatics infrastructure

European Robotics Forum 2024 Cristian Secchi,Lorenzo Marconi,2024-12-31 This book collects the scientific contributions presented at the European Robotics Forum ERF 2024 that is the reference event for the EuRobotics association In the months leading up to the forum a direct call was launched to the many industrial players who are members of EuRobotics and who were asked to specify particularly important areas of development according to their roadmap The outcome of this survey and the topics of the Workshops held during the forum have been used to calibrate an industry driven scientific program where research objectives meet industrial needs The contributions collected in the book cover a wide spectrum of robotics research encompassing mechatronics algorithms Artificial Intelligence Human Robot Collaboration and many robotic applications
