Netflixed Gina Keating, 2012-10-11 Netflix has come a long way since 1997 when two Silicon Valley entrepreneurs Marc Randolph and Reed Hastings decided to start an online DVD store before most people owned a DVD player. They were surprised and elated when launch day traffic in April 1998 crashed their server and resulted in 150 sales. Today Netflix has more than 25 million subscribers and annual revenues above 3 billion. Yet long term success or even survival is still far from guaranteed. Journalist Gina Keating recounts the absorbing fast paced drama of the company's turbulent rise to the top and its attempt to invent two new kinds of business. First it engaged in a grueling war against video store behemoth Blockbuster transforming movie rental forever. Then it jumped into an even bigger battle for online video streaming against Google, Hulu, Amazon and the big cable companies. Netflix ushered in such innovations as DVD rental by mail, a patented online queue of upcoming rentals and a recommendation algorithm called Cinematch that proved crucial in its struggle against bigger rivals. Yet for all its success Netflix is still a polarizing company. Hastings is often heralded as a visionary; he was named Business Person of the Year in 2010 by Fortune even as he has been called the nation's worst CEO. Netflix also faces disgruntled customers after price increases and other stumbles that could tarnish the brand forever. The quest to become the world's portal for premium video on demand will determine nothing less than the future of entertainment and the Internet. Drawing on extensive new interviews and her years covering Netflix as a financial and entertainment reporter, Keating makes this tale as absorbing as it is important.

Cybercrime and Digital Deviance Roderick S. Graham, 'Shawn K. Smith, 2019-09-10 Cybercrime and Digital Deviance is a work that combines insights from sociology criminology and computer science to explore cybercrimes such as hacking and romance scams along with forms of cyberdeviance such as pornography addiction trolling and flaming Other issues are explored including cybercrime investigations organized cybercrime the use of algorithms in policing cybervictimization and the theories used to explain cybercrime Graham and Smith make a conceptual distinction between a terrestrial physical environment and a single digital environment produced through networked computers Conceptualizing the online space as a distinct environment for social interaction links this text with assumptions made in the fields of urban sociology or rural criminology Students in sociology and criminology will have a familiar entry point for understanding what may appear to be a technologically complex course of

study The authors organize all forms of cybercrime and cyberdeviance by applying a typology developed by David Wall cybertrespass cyberdeception cyberviolence and cyberpornography This typology is simple enough for students just beginning their inquiry into cybercrime Because it is based on legal categories of trespassing fraud violent crimes against persons and moral transgressions it provides a solid foundation for deeper study Taken together Graham and Smith s application of a digital environment and Wall s cybercrime typology makes this an ideal upper level text for students in sociology and criminal justice It is also an ideal introductory text for students within the emerging disciplines of cybercrime and cybersecurity
