The Routledge Companion to Dyslexia Gavin Reid, 2012-06-25 The Routledge Companion to Dyslexia is a ground breaking analysis of the whole field of dyslexia by a distinguished team of international contributors and editors engaged in literacy inclusion and learning. Their diverse perspectives and wide expertise make this invaluable guide one of the most important additions to the field of dyslexia for over a decade. Dyslexia is without doubt the most high profile and contentious learning difficulty and it is a topic that has attracted a vast amount of research, opinion, professional schisms and debate. The Companion provides an invaluable overview of the field of dyslexia with vital and clear emphasis on linking theoretical perspectives with best practice. This accessible text presents a survey of current and future development in research with a focus on how research can inform practice. It focuses on areas such as neurobiology, phonological processing, literacy acquisition, numeracy and multilingualism, considers assessment and identification with contributions on early identification, reading, spelling and mathematics, addresses identifying and meeting needs in an inclusive context, discusses inclusion and barriers to learning in a variety of different national contexts, includes models of instruction: direct instruction, co-operative learning and cross-curricular learning. The Routledge Companion to Dyslexia is a superb resource for anyone interested in the subject, whether in education or related subjects such as psychology or neurology. Fully indexed and cross-referenced with helpful further reading sections at the end of each entry, it is ideal for those coming to the field of dyslexia for the first time as well as students and practitioners already familiar with the subject.

Base-1 method: A structural-functional approach to word, sentence and discourse readability Bernd Nuss, 2018 Text readability is at the core of successful reading instruction and language learning. To counteract the challenges of complex reading content, text leveling is a vital necessity for readers with limited language access. A transdisciplinary analysis of reading development and linguistic interrelations builds the theoretical foundation of the base 1 method. This method focuses solely on structural and functional text elements on the word, sentence and cohesion level. But this book also discusses the significance of other prevalent readability factors such as the reader's language knowledge or socio-cultural background. The base 1 method is designed to level early reading texts in German and other alphabetic languages. Experimental tests with a German immersion population have led to a preliminary calibration to demonstrate the validity of this approach. Bernd Nuss ist erfahrener Immersionslehrer in verschiedenen Programmen, die sich über Nord, Zentral und Südamerika erstrecken. An der E. E. Waddell Language Academy wirkt er schulintern als Immersion Facilitator, kooperiert mit Bildungsorganisationen und betreut die Praktika von Gaststudierenden an der Schule. Bernd Nuss has worked as an educator and facilitator in English and German language immersion programs all over the Americas and in Europe. In this capacity, he has also been collaborating as a researcher with universities and other educational institutions in Europe, Asia and the USA.
