From Pictures to the Cloud 2025 AUTHOR:1-Praneet Amul Akash Cherukuri AUTHOR:2-Dr. Santosh Kumar Henge, PREFACE The past decade has moved machine learning from academic curiosity to an invisible utility pulsing through every photograph we snap and every swipe we make A face unlocks a phone a drone inspects a bridge a doctor consults an algorithm before a diagnosis all powered by models that see learn and act in real time Yet for students and engineers stepping into the field the journey from inquisitive Hello world notebook to a production grade model running on an edge

device or a cloud endpoint can feel disjointed and opaque Practical Machine Learning From Pictures to the Cloud was born of that gap In our classrooms and industry collaborations at S R University we watched learners master isolated concepts convolutional layers hyper parameter tuning REST APIs without a blueprint that tied them together This book offers that blueprint We start with raw pixels guide you through feature engineering and modern deep learning architectures and then scale the conversation outward how to train responsibly deploy at cloud scale monitor for drift and govern for fairness and privacy What makes the text practical is its bias toward end to end reproducibility Every chapter couple s theory with hands on labs drawn from real engagements in health care smart cities retail and autonomous systems Code examples ship as containerised notebooks pipeline diagrams map directly to the managed services of AWS Google Cloud Azure and open source stacks like Kubeflow and Feast Whether your workstation is a laptop or a GPU cluster you can follow the same lifecycle we use in production Equally vital is the ethical lens threaded throughout As image models grow more capable they also magnify risks bias surveillance ecological cost You will find checklists case studies and policy references alongside optimisation tricks because robustness and responsibility are no longer optional extras they are success criteria The book is organised in three movements 1 Seeing fundamentals of image data classical vision and modern convolutional transformer networks 2 Learning advanced training techniques transfer learning hyper parameter tuning and explainability 3 Serving scalable pipelines cloud deployment edge inference monitoring cost governance and compliance Our intended audience spans senior undergraduates graduate students and practitioners who know basic Python and linear algebra but want to take the leap into full stack machine learning engineering We owe gratitude to our students whose incisive questions shaped the narrative and to industry partners who opened their architectures for case studies Any errors that remain are ours alone We hope this book becomes your desk companion as you turn pixels into insights and models into value responsibly reproducibly and at scale Authors

Confessional Video Art and Subjectivity Jaye Early, 2025-01-23 This is the first book of its kind to examine the development of the confessional subject in video art and demonstrate how it can provide a vital platform for navigating the politics of self subjectivity and resistance in society. In doing so, it reframes video art, the most ubiquitous and yet most understudied art form of recent decades, as an urgent socio-political tool that is increasingly popular among contemporary artists as a means of exploring a broad range of social issues from politics and identity to the body and technologies of self-representation. Analysing a diverse selection of case studies from the 1960s up to the present day, covering the work of Yoko Ono, Gillian Wearing, Ryan Trecartin, Tracey Emin, Anastasia Klose, and Heath Franco, among others, the book brings together theory and practice to look afresh at contemporary video art through a Foucauldian lens. It also brings the analysis of video art up to date by showing how social media and digital self-representation has informed and further politicized time-based art practices. *Confessional Video Art and Subjectivity* shows how forms of confessional discourse not only play an important function in the construction of subjectivity but also open spaces for personal resistance and agency within contemporary video art. As a result, it offers researchers of contemporary art practice and media and cultural studies an updated framework through which to view this constantly evolving genre and a deeper understanding of wider contemporary video practices.
