Romance for Sale in Early Modern England Steve Mentz, 2017-09-29 The major claim made by this study is that early modern English prose fiction self-consciously invented a new form of literary culture in which professional writers created books to be printed and sold to anonymous readers. It further claims that this period's narrative innovations emerged not solely from changes in early modern culture like print and the book market but also from the rediscovery of a forgotten late classical text from North Africa: Heliodorus's *Aethiopian History*. In making these claims, Steve Mentz provides a comprehensive historicist and formalist account of prose romance, the most important genre of Elizabethan fiction. He explores how authors and publishers of prose fiction in late sixteenth-century England produced books that combined traditional narrative forms with a dynamic new understanding of the relationship between text and audience. Though prose fiction would not dominate English literary culture until the eighteenth century, Mentz demonstrates that the form began to invent itself as a distinct literary kind in England nearly two centuries earlier. Examining the divergent but interlocking careers of Robert Greene, Sir Philip Sidney, Thomas Lodge, and Thomas Nashe, Mentz traces how, through differing commitments to print culture and their respective engagements with Heliodoran romance, these authors helped make the genre of prose fiction culturally and economically viable in England. Mentz explores how the advent of print and the book

market changed literary discourse influencing new conceptions of what he calls middlebrow narrative and new habits of reading and writing This study draws together three important strains of current scholarly inquiry the history of the book and print culture the study of popular fiction and the re examination of genre and influence It also connects early modern fiction with longer histories of prose fiction and the rise of the modern novel **Malcolm. to play with naming in a way that previously established genres are not The book begins with a discussion of the medieval background to romance and explores a series of naming patterns found across a broad range of texts It continues with detailed analysis of twenty one romances in English French and Anglo Norman from 1130 to 1500 to show how naming themes are treated differently in each and to demonstrate the importance of name as a generic marker Finally an appendix provides details of each romance s context together with indications for further research JANE BLISS is an independent scholar she gained her PhD from Oxford Brookes University
