addressed in this book covers the existence of a potential steady state in between these two poles. Our basic hypothesis is that there might be such a steady state due to the immobility of some tax bases and where the taxation of these bases have no externalities affecting investment. We argue that the very complex tax structures of Europe and the tax certainty facing investors in Europe need to be addressed in a comprehensive way. *Estimating the Base of the Value-Added Tax (VAT) in Developing Countries* Mr. George A. Mackenzie, 1991-02-01. Developing countries with VATs typically exempt a large number of goods and services. Following a brief discussion of the rationale for exemptions, this paper presents a formula for the base of a VAT with exemptions. Two basic adjustments must be made to the base without exemptions: subtraction of the value of sales to consumers of exempt industries and addition of intermediate sales of taxable inputs to exempt industries. The paper concludes with a derivation of the elasticity of a VAT with exemptions with respect to aggregate consumption and a discussion of the implications of technological change for the VAT base. *OECD Investment Policy Reviews: Mauritius 2024* OECD, 2024-09-06. This review assesses the climate for domestic and foreign investment in Mauritius. It discusses the challenges and opportunities faced by the government in its reform efforts. Capitalising on the OECD Policy Framework for Investment and the OECD Foreign Direct Investment Qualities Policy Toolkit, this review explores trends and qualities in foreign investment, development successes and productivity challenges, investment policy, investment promotion and facilitation, and investment incentives. The review highlights potential reform priorities to help Mauritius fulfil its development ambitions that align with its commitment to comply with the principles of openness, transparency and non-discrimination. This report also helps Mauritius as a new Adherent to the OECD Declaration on International Investment and Multinational Enterprises to promote greater investment policy transparency as well as responsible business conduct.

Professor Baron.com. **OECD Investment Policy Reviews: Kazakhstan 2017**

Collectif, 2017-06-15. This review, which was prepared in response to Kazakhstan's 2012 request to adhere to the Declaration on International Investment and Multinational Enterprises, OECD Declaration, analyses the general framework for investment

as well as most recent reforms and shows where further efforts are necessary. It assesses Kazakhstan's ability to comply with the principles of openness, transparency and non-discrimination and its policy convergence with the OECD Declaration including responsible business conduct practices. Capitalising on the OECD Policy Framework for Investment, this review studies other policy areas that are of key relevance to investment such as SME policy, infrastructure development, trade policy as well as anti-corruption efforts. Since the first review of Kazakhstan in 2012, the authorities have made strides in opening the country to international investment and in improving the policy framework for investment as part of their efforts to diversify the economy to avoid continued overreliance on oil. Additional policy measures are nevertheless required to create a stimulating environment for investment if the government wants to fulfil its goal of economic diversification and sustainable development.

Taxing Ourselves, fifth edition Joel Slemrod, Jon Bakija, 2017-06-02. The new edition of a popular guide to the key issues in tax reform presented in a clear, nontechnical and unbiased way. To follow the debate over tax reform, the interested citizen is often forced to choose between misleading sound bites and academic treatises. *Taxing Ourselves* bridges the gap between the oversimplified and the arcane, presenting the key issues clearly and without a political agenda. Tax policy experts Joel Slemrod and Jon Bakija lay out in accessible language what is known and not known about how taxes affect the economy and offer guidelines for evaluating tax systems, both the current tax system and proposals to reform it. This fifth edition has been extensively revised to incorporate the latest data, empirical evidence and tax law. It offers new material on recent tax reform proposals, expanded coverage of international tax issues and the latest enforcement initiatives. Offering historical perspectives, outlining the basic criteria by which tax policy should be judged (fairness, economic impact, enforceability), examining proposals for both radical change (replacement of the income tax with a flat tax or consumption tax) and incremental changes to the current system, and concluding with a voter's guide, the book provides readers with enough background to make informed judgments about how we should tax ourselves. Praise for earlier editions: "An excellent book," Jeff Medrick, *New York Times*; "A fair-minded exposition of a politically loaded subject," Kirkus Reviews.

Taxation and Unemployment Mr. Howell H. Zee, 1996-05-01. This paper reviews conceptual linkages between taxation and unemployment, available empirical evidence and country policies that may have a bearing on these linkages in the OECD and in a sample of developing and transitional economies. Fund policy advice on these issues and tax policy options in addressing the unemployment problem. It concludes that the emphasis in policy should be placed on minimizing tax distortions rather than on formulating activist tax policies to reduce unemployment.
