The Encyclopedia of Best Films Jay Robert Nash, 2019-10-23 This all inclusive A Z encyclopedia by one of the world's foremost experts on cinema provides comprehensive annotations of the best films produced from 1914 on. The work offers more than 5 000 three to five star entries: three stars good, four stars excellent, five stars masterpiece, and yes, author Jay Robert Nash has viewed every single one of them as well as many more that did not make the cut. In addition to a precis, each film's entry also includes a listing of the cast as well as the key principles involved in production from the director to the hair stylist. Especially unique to this book is a rating system that helps parents determine whether or not a film is appropriate for their children. Unlike the industry rating system which can be influenced by studio lobbying, Nash objectively evaluates each film and confers upon it one of four recommendations for viewing: recommended, acceptable, cautionary, and unacceptable. Backmatter includes a list of top films by genre: i.e. animated, drama, sports, mystery, adventure, etc. as well as an annotated name index listing all persons mentioned along with their dates of birth and death. Rounding out this essential volume for the film buff are over 500 still photos from the author's private collection.

Some of Your Blood Theodore Sturgeon, 2012-12-07 Army psychiatrist Philip Outerbridge receives a confidential folder containing the letters, memos, and transcripts for a young soldier named George Smith, a quiet young man with a terrible past and a shocking secret. As Outerbridge conducts George's therapy, he gradually discovers the truth about George's traumatic childhood, his twisted romance with an older woman named Anna, and the unusual obsession George keeps hidden from the world.

A Quantum City Ludger Hovestadt, Vera Bühlmann, 2015-06-16 We know the specific strengths of various cities, are aware of their ranking, are able to discuss their density and growth. But what do all cities have in common? What do we know about the lowest common denominator? The city as a species, the primal genetic material of the city, this is the subject of *A Quantum City*. This colossal work is a love letter to the city and intellectual culture. We follow the fictional narrative figure Orlando beginning in 320 BC on his odyssey through the Western world up to the present time. The book is divided into four interrelated chapters and can be read page by page in a discursive manner; however, randomly browsing through the book also offers new and multi-faceted interpretations. Great intellectual achievements are compared with obscure and mundane events. *A Quantum City* offers an inspiring view of the city that is in us and around us.
