Taxation in the Digital Economy Nella Hendriyetty, Chris Evans, Chul Ju Kim, Farhad Taghizadeh-Hesary, 2022-07-11 A robust and efficient tax administration in a modern tax system requires effective tax policies and legislation Policy frameworks should cover all aspects of tax administration and include the essential processes of capturing processing analyzing and responding to information provided by taxpayers and others concerning taxpayers affairs By far the greatest challenges facing tax administrations in all countries are those posed by the continuing developments in the digital economy Whereas societies are grappling to come to terms with the transitions from the third industrial or digital revolutions revenue authorities grapple with the consequences for the sustainability of their tax bases and the efficient administration and collection of taxes This book presents a critical review of the status of tax systems in Asia and the Pacific in the era of the digital economy The book suggests how countries can maximize their domestic resource mobilization when confronted by the challenges that digitalization inevitably produces as well as how they can best harness or take advantage of aspects of digitalization to serve their own needs The full implications of the COVID 19 crisis are still too uncertain to predict but it is clear that the crisis will accelerate the trend towards digitalization and also increase pressures on public finances This in turn may shape the preference for and the nature of both multilateral and unilateral responses to the tax challenges posed by digitalization and the need to address them This book will be a timely reference for those researching on taxation in digital economy and for policy makers The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license *PC Mag*, 2004-01-20 PCMag.com is a leading authority on technology delivering Labs based independent reviews of the latest products and services Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology

Tax Law and Digitalization: The New Frontier for Government and Business Jeffrey Owens, Robert Risse, 2021-09-15 New technologies are changing the way that tax administrations taxpayers and their advisers interact leading to a reduction in the compliance cost for taxpayers a level playing field for large and small businesses and fewer opportunities to engage in aggressive tax practices Although entering a new world where processes are supported by machines inevitably disrupts traditional ways of working the contributors to this indispensable book reveal the enormous potential of tax technology to positively transform tax compliance clearly showing both government and business how to manage the transition from the old to the new With detailed treatment of the technology available in the tax field the authors describe how to secure its benefits in such ways as the following electronic balance sheets and invoices automated transmission to tax authorities innovative analytics applications blockchain in tax law processes process mining in VAT real time reporting with cryptography and meeting the challenges to taxpayers rights to privacy and personal data protection The contributions draw on an international conference held under the auspices of the Digital Economy Taxation Network at the Vienna University of Economics and Business in December 2020 The perspective throughout focuses on how to achieve better tax compliance at a

lower cost For this reason this full scale practical guide on how to adapt tax law to new technologies and how to apply tax tech processes in practice will be welcomed by tax practitioners tax administrations and academics across the entire tax community

Law, Technology and Governance Roger Brownsword,2025-09-23 This book argues that law regulation and technology can be understood as particular kinds of governance projects and their credentials assessed according to an overarching concept of good governance The book introduces the ideas of governance by law and governance by regulation as particular types of projects within a constellation of governance projects some normative some non normative and some hybrid As such legal and regulatory projects can be differentiated from each other as well as from other normative governance projects such as ethics They can also be contrasted with various kinds of non normative technological projects and more importantly they can be compared with governance projects that are hybrids such as rule and tool projects Based on this account of governance the limitations and imperfections of legal and regulatory governance relative to an overarching concept of good governance become readily apparent Focusing on governance projects governance problems and governance prospects the book thereby offers an insightful and original analysis of the current and future intersection of law technology and governance This book will be of interest to legal researchers and postgraduates in the burgeoning field of law regulation and technology as well as others with more general interests in issues of law and governance
