**Meaningful Technologies** Eric Chown, Fernando Nascimento, 2023-01-09. As smartphones mediate more of our activities, they are changing our relationship with meaning. To a teenager, for example, a conversation is just as likely to refer to an exchange of text messages as it is a face-to-face discussion. Meanwhile, Facebook has redefined what friendship means, Snapchat what a memory means, etc. The kinds of changes smartphones bring are happening at rapid pace. TikTok reached a billion users in just over three years, whereas it took the telephone 75 years to reach a tenth of that number of people. **Meaningful Technologies: How Digital Metaphors Change the Way We Think and Live** by Eric Chown and Fernando Nascimento offers systematic reconsideration of the ways in which digital technologies impact our lives, both individually and collectively. Metaphors aren't just a clever way to describe technology; they are also changing the way we think. When we click on a picture of a shopping cart, it connects a complex set of technologies to represent a simple idea that we're all familiar with. A heart icon under a photo is understood as an easy way to express appreciation. We aren't required to understand how technology works, just how we interact with it. The ambiguity of metaphors and the complexity of technology can also hide important realities about what is being described. The cloud, for example, actually consists of very real data centers which consume huge amounts of natural resources to keep running. Meanwhile, pressing that heart icon on a photo is a signal to the artificial intelligences running in your app that you want to see more things like that photo and that it should adjust what it knows about you accordingly. There is a constant feedback loop between us and the digital technologies we use. We are constantly using them, and they are changing us through their usage. **Meaningful Technologies** focuses on this loop from the perspectives of hermeneutic philosophy and cognitive science. Through the former, the authors examine meaning and how it changes over time. Through the latter, they gain understanding of how this feedback loop impacts individuals, especially in terms of learning and attention. Chown and Nascimento argue that, on the one hand, apps have a kind of agency never before possible in a technology, but also that, armed with a critical framework for examining such apps, we can regain some of our own agency. This book will appeal to scholars of digital media, digital and computational studies, and those interested in issues related to the ethical impacts of digital technologies.

**Non-Toxic** Aly Cohen, Frederick S. Vom Saal, 2020. **Non-Toxic** is an insightful, even-handed, evidence-based discussion about the environment in which we now find ourselves living, the environmental hazards around us, and ways in

which we may better protect ourselves and our families from increased risk of illness and disease due to harmful chemical and radiation exposure. Espousing the principles developed by famed physician and author Dr Andrew Weil and making them accessible for the general reader, the book takes account of the whole person including all aspects of lifestyle in offering guidance to living healthy in a chemical world. After a brief historical perspective and easily understandable discussion of the anatomy, physiology and defense mechanisms of the human body, the authors review common everyday chemicals and describe how our bodies protect us with many amazing defenses, both physical barriers and through metabolism. This book discusses issues surrounding clean water and air and helps equip the reader to better understand daily risk exposures and encourages the reader to start making practical positive changes immediately. Written by a physician board certified in Integrative Medicine and a PhD toxicologist, the book is replete with relevant, cost-effective and practical ways to reduce exposure and lower risk for the developing illness. Tips and recommendations are given for choosing and preparing foods, methods of cooking and cleaning and how to choose safer household furnishings, toys and personal care products. Throughout, the authors' goal is to help readers decode technical concepts such as understanding product labels and wading through the confusing and often misleading waters of marketing terminology. Each chapter concludes with a list of references documenting the clinical studies and other scientific evidence for the recommendations in the book.
