A Mental Health Provider's Guide to Telehealth Jonathan G. Perle, 2021-03-31 This book works as a guide to videoconferencing practice for psychological providers through a broad simplified and practical overview of pertinent factors. It is a consolidation of research literature and professional experiences of practicing teaching and studying videoconferencing. It begins by defining key concepts such as telehealth, telepsychology, and other related terminology and examining the role of telehealth in addressing ongoing mental health disparities. An overview of existing videoconferencing practices, guidebooks, and general recommendations, as well as specifics of ethical and legal factors, are discussed. The book then details numerous essential factors of videoconferencing practice that are directly applicable to psychological care, including considerations of computer system, video camera, display screen, microphone, videoconferencing platform, bandwidth, and latency, and room setup, along with self-care practices. The appendices provide readers with links to resources, checklists, and other documents to guide their practice. Psychologists, counselors, and other mental health providers will find this user-friendly, research-informed guide indispensable when implementing online treatment and teletherapy.

Clinical Guide to Mental Disability Evaluations Liza Gold, Donna L. Vanderpool, 2013-01-11 Disability evaluations are the most common clinical mental health evaluations conducted for nontreatment purposes. They place mental health professionals in the role of communicating information that is typically confidential to administrative and legal systems. Unfortunately, mental health professionals receive little to no training in conducting assessments that focus on disability and disability management and often do not understand the implications and risks of providing this information, especially without conducting what are often specialized evaluations. *Clinical Guide to Mental Health Disability Evaluations* is geared for general mental health practitioners, providing them with the basic information needed to competently provide the various types of disability evaluations. It also provides enough information to inform forensic mental health providers in conducting more specialized evaluations.

A Thematic Guide to Documents on Health and Human Rights Gudmundur Alfredsson, Katarina Tomaševski, 2023-09-20 This publication is the second volume of Thematic Human Rights Guides published under the auspices of the Raoul Wallenberg Institute of Human Rights and Humanitarian Law The aim of the Guides as the title implies is to facilitate the use of international human rights standards by their systematic presentation Rather than reproducing full texts of various instruments substantive standards are grouped according to subject matter in order to enable users to quickly and easily locate the topic they may be looking for A detailed index with references to the many international instruments which address the same issue reinforces this thematic approach The choice of human rights and health for the second volume in this series highlights the aim of the Guides to map out the entire range of human rights and fundamental freedoms as they relate to a specific topic The sheer

size of this volume illustrates the number and variety of human rights standards relevant for health. Many of these standards have been generated by organizations dealing with health rather than human rights and quite a few are found under medical ethics rather than human rights. Subsuming medical ethics under international human rights law is a novel development pioneered by the Council of Europe. Elsewhere the two fields remain separate and the publication of this Guide is intended to overcome this separation. Documents have been included which provide an understanding of human rights within the health profession such as guidance to medical doctors with regard to abortion adopted by the International Medical Association and those human rights safeguards that have been elaborated to prevent abuses by health professionals such as those concerning mental health. All of these standards provide a substantive background for inter professional dialogue on the evolving understanding of human rights. A Thematic Guide to Documents on Health and Human Rights reflects the full range of issues encompassed by human rights and health. Besides the right to health a wide range of rights and freedoms can be and is affected by the health sector. Priority has been accorded to the crucial human rights safeguards namely those specifying protection against undue limitations or restrictions upon human rights. Much as with any other human rights topic those safeguards are best developed for categories that are most vulnerable to denials and violations of their rights. Detainees, prisoners, victims of armed conflicts, children and the mentally ill thus figure prominently.
