When it comes to disease who beats the odds and why When it comes to spontaneous healing skepticism abounds Doctors are taught that miraculous recoveries are flukes and as a result they don t study those cases or take them into account when treating patients Enter Dr Jeff Rediger who has spent over 15 years studying spontaneous healing pioneering the use of scientific tools to investigate recoveries from incurable illnesses Dr Rediger s research has taken him from America s top hospitals to healing centers around the world and along the way he s uncovered insights into why some people beat the odds In Cured Dr Rediger digs down to the root causes of illness showing how to create an environment that sets the stage for healing He reveals the patterns behind healing and lays out the physical and mental principles associated with recovery first we need to physically heal our diet and our immune systems Next we need to mentally heal our stress response and our identities Through rigorous research Dr Rediger shows that much of our physical reality is created in our minds Our perception changes our experience even to the point of changing our physical bodies and thus the healing of our identity may be our greatest tool to recovery Ultimately miracles only contradict what we know of nature at this point in time Cured leads the way in explaining the science behind these miracles and provides a first of its kind guidebook to both healing and preventing disease
