Swarms, Viral Writing, and the Local Carl Whithaus, 2025-04-15 *Swarms* examines the social and rhetorical dynamics around emerging writing technologies. Carl Whithaus argues that these dynamics work across networked publics as patterns of behavior and ways of interacting through and with multimodal texts. This rhetorical analysis of the production and reception of born digital rhetoric shows the ongoing and evolving impacts of online public discourse that can lead to bad restaurant reviews or the subversion of democracy. It is a networked process that gains significance because of the interplay and tensions between the global and the local. As these texts are created, distributed, received, and then recreated and shared again in viral ways, different messages resonate across media ecologies. Whithaus documents how emerging social dynamics shape and are shaped by digital writing, reading, and distribution technologies. **Ludic, Co-design and Tools Supporting Smart Learning Ecosystems and Smart Education** Óscar Mealha, Matthias Rehm, Traian Rebedea, 2020-09-09 This book presents papers from the 5th International Conference on Smart Learning Ecosystems and Regional Development which promotes discussions on R D work, policies, case studies, entrepreneur experiences with a particular focus on understanding the relevance of smart learning ecosystems for regional development and social innovation and how the effectiveness of the relation of citizens and smart ecosystems can be boosted. The book explores how technology-mediated instruments can foster citizens' engagement with learning ecosystems and territories, providing insights into innovative human-centric design and development models, techniques, education training practices, informal social learning, innovative citizen-driven policies, and technology-mediated experiences and their impact. As such, it will inspire the social innovation sectors and ICT as well as economic development and deployment strategies and new policies for smarter, proactive citizens. **The Dark Social** Toija Cinque, Alexia Maddox, Robert W. Gehl, 2023-11-07 This book explores how people interact online through anonymous communication in encrypted, hidden, or otherwise obscured online spaces. Beyond the Dark Web itself, this book examines how the concept of dark social broadens the possibilities for examining notions of darkness and sociality in the age of digitality and datafied life. The authors take into account technical, moral, ethical, and pragmatic responses to ourselves and communities seeking to belong in or of the dark. Scholarship on the Darknet and Dark Social Spaces tends to focus on the uses of encryption and other privacy-enhancing technologies to engender resistance acts. Such understandings of the dark social are naturally in tension with social and political theories which argue that for politics and acts to matter, they must appear in the public light. They are also in tension with popular narratives of the dark recesses of the web which are disparaged by structural powers who seek to keep their subjects knowable and locatable on the clear web. The binary of dark versus light is challenged in this book. The authors' provocation is that practices of dark resistance, motility, and power are enacted by emerging data cultures. This book draws together scholarship, activism, and creativity to push past conceptual binary positions and create new approaches to darknet and dark

The Impact Equation Chris Brogan,Julien Stanwell Smith,2012-10-25 Anyone can write a blog post but not everyone can get it liked thirty five thousand times and not everyone can get seventy five thousand subscribers But the reason we've done these things isn't because we're special It's because we tried and failed the same way you learn to ride a bike We tried again and again and now we have an idea how to get from point A to point B faster because of it Three short years ago when Chris Brogan and Julien Smith wrote their bestseller Trust Agents being interesting and human on the Web was enough to build a significant audience But now everybody has a platform The problem is that most of them are just making noise In *The Impact Equation* Brogan and Smith show that to make people truly care about what you have to say you need more than just a good idea trust among your audience or a certain number of followers You need a potent mix of all of the above and more Use the Impact Equation to figure out what you're doing right and wrong Apply it to a blog a tweet a video or a mainstream media advertising campaign Use it to explain why a feature in a national newspaper that reaches millions might have less impact than a blog post that reaches a thousand passionate subscribers Consider the phenomenally successful British singer Adele For most musicians onstage banter basically consists of yelling Hello Cleveland But Adele connects with her audience pausing between songs to discuss a falling out with her friends or the drama of a break up Each of these moments comes off as if she were talking directly with you and you can easily relate Adele has Impact As the traditional channels for marketing selling and influencing disappear and more people interact mainly online the very nature of attention is changing *The Impact Equation* will give you the tools and metrics that guarantee your message will be heard

The Hidden Psychology of Social Networks: How Brands Create Authentic Engagement by Understanding What Motivates Us Joe

Federer,2020-09-15 From the former Head of Brand Strategy at Reddit comes a proven and thought provoking approach to the digital economy and how brands can create authentic engagement that is rooted in the fundamental motivations behind human psychology Leading marketing practitioner and thought leader Joe Federer draws on evolutionary biology anthropology neuroanatomy and psychology as well as more than a decade of hands on experience to explain why people act so differently in various online spaces and what they are seeking from participating in each one With a framework based on Freud's Id Ego and Superego model of the human psyche he demonstrates how the internet is a digital reflection of the collective human psyche and how different social networks correspond to different mindsets platforms like Reddit to the unfiltered Id Facebook and Twitter to the managed Ego and Instagram to the ideal Superego In the same way you behave differently when you're home alone out with friends communicating with family or interacting with coworkers people act and express themselves differently in these various online spaces Context matters Understanding this will enable you to develop and execute effective engagement strategies to reach your target audiences on each social network Learn how to create

content that drives sharing and word of mouth how brands can fit natively into different types of social channels how to balance branded social presences across different networks why authenticity will only grow in importance to consumers Fascinating and deeply compelling The Hidden Psychology of Social Networks will equip you to make vastly more efficient use of your media buys establish more thoughtful strategies develop better creative and in the end deliver more effective marketing that provides value **Brevarium philosophiae scholasticae** Eugène Grandclaude,1886
