Side Hustle Ideas Hulu 2025:

Ideas Don't Die. Companies Do. Hari Abburi, 2025-06-30 Rethink ideas as the real value to the future of your business in a technology world where knowledge is increasingly a commodity In *Ideas Don't Die Companies Do* renowned voice on disruptive agility and executive Hari Abburi delivers an insightful framework for leaders to future proof their companies by creating an idea obsessed enterprise In the book you'll learn why ideas are more important than customers to disrupt the industry and marketplace The author explains how to distinguish between ideas that are truly original and those that require strategic execution to differentiate them from other choices on the market He offers key insights into how to glean information from other companies who have worked with the idea and how to apply that knowledge to your firm's own idea Inside the book Explanations of the idea moat that creates exponential value at one company as opposed to another that uses similar ideas Compelling answers to questions about idea timing and why ideas that failed a few years ago can be successful today How to shift your company's focus from thinking customers to thinking ideas Perfect for managers executives entrepreneurs founders and other business leaders *Ideas Don't Die Companies Do* will also benefit product team leaders and other innovators with a desire to bring new and exciting ideas to the market

Patent Law: Cases, Problems, and Materials (4th Edition 2025) Jonathan S. Masur, Lisa Larrimore Ouellette, 2025-07-01 Patent Law Cases Problems and Materials 4th Edition 2025 is a free casebook co-authored by Professor Jonathan S Masur University of Chicago Law School and Professor Lisa Larrimore Ouellette Stanford Law School The casebook is focused on bringing conceptual clarity to the details of modern patent practice while also placing patent law in its social context Many practice problems throughout the casebook allow students to apply patent doctrines to fact patterns from real cases and to hypotheticals constructed to isolate and explain difficult concepts So far it has been adopted at over 70 law schools The casebook is made available under a Creative Commons Attribution NonCommercial NoDerivatives 4.0 International License A digital version of the casebook can be downloaded free online and a printed copy can be purchased at cost

Legal Protection for Computer-Implemented Inventions Claudia Schwarz, Sabine Kruspig, 2025-09-23 As a result of the incorporation of computer software into countless commercial and industrial products the patentability of software and inventions in the area of Artificial Intelligence has become a vital issue in intellectual property law This indispensable book provides an overview of the current status of computer implemented inventions in patent law in major jurisdictions worldwide and in Europe A hugely practical field research tool with guidance based on case law it examines the major hurdles in each particular country and describes the best practice to be adopted The legal situation in the key countries is summarized based on a list of twenty seven law related questions providing a condensed overview Clearly showing how enforceable software patent applications can be competitively drafted and how a patent portfolio for computer implemented inventions can be established in several countries without spending money unnecessarily on problematic examination proceedings this book covers such issues and

topics as the following important case law in particular before the European Patent Office EPO for technicality issues sufficient level of abstraction versus breadth of the claimed invention how to overcome typical objections in the respective national examination proceedings best practice examples and case studies comparing different national peculiarities in the area of computing With separate chapters for the EPO and the key countries Germany the United States China Korea Japan and India the legal situation for software related inventions in each country or region this book includes guidance on prosecution under national law analyses of relevant court decisions practice checklists and an outlook on future developments The authors describe claim formulation based on actual cases and on principles of computer science in order to show what might or might not be patentable in each jurisdiction With this incomparable resource patent attorneys and patent professionals in companies will get a basis for making decisions about the most appropriate jurisdictions in which to file patent applications This book will also be of great value to computer professionals who are affected by the protection of software or who are actively involved in the protection of software by patent law Social Starters Andrea
