projects Move from prototyping to production using Comet and DevOps tools Get to grips with the Comet experimentation platform Book Description This book provides concepts and practical use cases which can be used to quickly build monitor and optimize data science projects Using Comet you will learn how to manage almost every step of the data science process from data collection through to creating deploying and monitoring a machine learning model The book starts by explaining the features of Comet along with exploratory data analysis and model evaluation in Comet You ll see how Comet gives you the freedom to choose from a selection of programming languages depending on which is best suited to your needs Next you will focus on workspaces projects experiments and models You will also learn how to build a narrative from your data using the features provided by Comet Later you will review the basic concepts behind DevOps and how to extend the GitLab DevOps platform with Comet further enhancing your ability to deploy your data science projects Finally you will cover various use cases of Comet in machine learning NLP deep learning and time series analysis gaining hands on experience with some of the most interesting and valuable data science techniques available By the end of this book you will be able to confidently build data science pipelines according to bespoke specifications and manage them through Comet What you will learn Prepare for your project with the right data Understand the purposes of different machine learning algorithms Get up and running with Comet to manage and monitor your pipelines Understand how Comet works and how to get the most out of it See how you can use Comet for machine learning Discover how to integrate Comet with GitLab Work with Comet for NLP deep learning and time series analysis Who this book is for This book is for anyone who has programming experience and wants to learn how to manage and optimize a complete data science lifecycle using Comet and other DevOps platforms Although an understanding of basic data science concepts and programming concepts is needed no prior knowledge of Comet and DevOps is required Popular Science ,2004-01 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better **Space, Science & Other Things - Elementary (K-8) Interactive Space Show** Sandra Bojtos Hart,2005-09-06 Space Science Other Things a FUN approach and strategy for teaching science math music and language arts to elementary and middle school students The book is a manual for presenting a 1 1 2 hour Interactive Chemistry Physics Show for a multitude of audiences from Preschool through 8th grade integrating the subjects using a space science theme a show filled with science magic music aliens experiments as well as directions for building a mission control panel alien costumes student uniforms building a space shuttle cabin that holds about 24 students or more along with using 54 audience participants Twenty one chapters are filled with instructions and step by step directions dialog diagrams pictures suggested activities objectives experiments sample letters permission forms and certificates to help guide teachers to be creative in their teaching to be able to present the show to their school *Hands-On Data Science and Python Machine Learning* Frank Kane,2017-07-31 This book covers the

fundamentals of machine learning with Python in a concise and dynamic manner It covers data mining and large scale machine learning using Apache Spark About This Book Take your first steps in the world of data science by understanding the tools and techniques of data analysis Train efficient Machine Learning models in Python using the supervised and unsupervised learning methods Learn how to use Apache Spark for processing Big Data efficiently Who This Book Is For If you are a budding data scientist or a data analyst who wants to analyze and gain actionable insights from data using Python this book is for you Programmers with some experience in Python who want to enter the lucrative world of Data Science will also find this book to be very useful but you don t need to be an expert Python coder or mathematician to get the most from this book What You Will Learn Learn how to clean your data and ready it for analysis Implement the popular clustering and regression methods in Python Train efficient machine learning models using decision trees and random forests Visualize the results of your analysis using Python s Matplotlib library Use Apache Spark s MLlib package to perform machine learning on large datasets In Detail Join Frank Kane who worked on Amazon and IMDb s machine learning algorithms as he guides you on your first steps into the world of data science Hands On Data Science and Python Machine Learning gives you the tools that you need to understand and explore the core topics in the field and the confidence and practice to build and analyze your own machine learning models With the help of interesting and easy to follow practical examples Frank Kane explains potentially complex topics such as Bayesian methods and K means clustering in a way that anybody can understand them Based on Frank s successful data science course Hands On Data Science and Python Machine Learning empowers you to conduct data analysis and perform efficient machine learning using Python Let Frank help you unearth the value in your data using the various data mining and data analysis techniques available in Python and to develop efficient predictive models to predict future results You will also learn how to perform large scale machine learning on Big Data using Apache Spark The book covers preparing your data for analysis training machine learning models and visualizing the final data analysis Style and approach This comprehensive book is a perfect blend of theory and hands on code examples in Python which can be used for your reference at any time [Popular Science](#) ,2002-08 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better **scikit-learn : Machine Learning Simplified** Raul Garreta,Guillermo Moncecchi,Trent Hauck,Gavin Hackeling,2017-11-10 Implement scikit learn into every step of the data science pipeline About This Book Use Python and scikit learn to create intelligent applications Discover how to apply algorithms in a variety of situations to tackle common and not so common challenges in the machine learning domain A practical example based guide to help you gain expertise in implementing and evaluating machine learning systems using scikit learn Who This Book Is For If you are a programmer and want to explore machine learning and data based methods to build intelligent applications and enhance your programming skills this is the course for you No

previous experience with machine learning algorithms is required

What You Will Learn

Review fundamental concepts including supervised and unsupervised experiences common tasks and performance metrics Classify objects from documents to human faces and flower species based on some of their features using a variety of methods from Support Vector Machines to Naive Bayes Use Decision Trees to explain the main causes of certain phenomena such as passenger survival on the Titanic Evaluate the performance of machine learning systems in common tasks Master algorithms of various levels of complexity and learn how to analyze data at the same time Learn just enough math to think about the connections between various algorithms Customize machine learning algorithms to fit your problem and learn how to modify them when the situation calls for it Incorporate other packages from the Python ecosystem to munge and visualize your dataset Improve the way you build your models using parallelization techniques

In Detail

Machine learning the art of creating applications that learn from experience and data has been around for many years Python is quickly becoming the go to language for analysts and data scientists due to its simplicity and flexibility moreover within the Python data space scikit learn is the unequivocal choice for machine learning The course combines an introduction to some of the main concepts and methods in machine learning with practical hands on examples of real world problems The course starts by walking through different methods to prepare your data be it a dataset with missing values or text columns that require the categories to be turned into indicator variables After the data is ready you ll learn different techniques aligned with different objectives be it a dataset with known outcomes such as sales by state or more complicated problems such as clustering similar customers Finally you ll learn how to polish your algorithm to ensure that it s both accurate and resilient to new datasets You will learn to incorporate machine learning in your applications Ranging from handwritten digit recognition to document classification examples are solved step by step using scikit learn and Python By the end of this course you will have learned how to build applications that learn from experience by applying the main concepts and techniques of machine learning

Style and Approach

Implement scikit learn using engaging examples and fun exercises and with a gentle and friendly but comprehensive learn by doing approach This is a practical course which analyzes compelling data about life health and death with the help of tutorials It offers you a useful way of interpreting the data that s specific to this course but that can also be applied to any other data This course is designed to be both a guide and a reference for moving beyond the basics of scikit learn
