Market-Oriented Disinformation Research Carlos Diaz Ruiz, 2025-03-25 Market Oriented Disinformation Research explores the spread of false or misleading information online through the lens of marketing theory and consumer research It examines how the business models of digital platforms and advertising technology firms AdTech generate digital markets that incentivize the circulation of harmful content for profit Rather than viewing disinformation and misinformation as accidental byproducts the book proposes that they thrive in the current markets designed for digital advertising and influencer marketing Readers will learn how the

amplification of disinformation can be linked to social media's business model. Examples include how social media algorithms promote addictive content, how fake news sites use ad fraud to lure in advertising revenue, and how some content creators rely on clickbait, ragebait, bots, and conspiracy theories to boost their engagement metrics. The book is a must read for scholars in journalism, media studies, and political communication, as well as policymakers interested in the democratic governance of social media platforms. In addition, it calls for digital marketing, advertising, and brand management professionals to take responsibility for their ad spending by advocating for greater oversight over AdTech intermediaries to prevent unethical actors from monetizing the harmful content that polarizes society and undermines democratic institutions.

Digital Technology in the Management and Prevention of Diabetes, volume II Yun Shen, Xiantong Zou, Gang Hu, 2025-11-11. Given the success of the previous collection *Digital Technology in the Management and Prevention of Diabetes*, we are pleased to announce the launch of Volume II. The field of digital technology in diabetes management and prevention has seen significant advancements in recent years. Diabetes, a chronic condition marked by elevated blood sugar levels due to insulin production or efficacy issues, poses a growing global health challenge. It affects individuals across all demographics, leading to severe complications such as cardiovascular diseases, kidney failure, and vision impairment, thereby diminishing quality of life and increasing mortality rates. The necessity for continuous monitoring and lifestyle adjustments underscores the importance of effective disease management. Digital technology has emerged as a transformative force in healthcare, offering innovative solutions for diabetes management through enhanced risk assessment, diagnosis, treatment, and telemedicine. The integration of health informatics facilitates seamless tracking and personalized care, benefiting both patients and healthcare providers. Despite these advancements, the full potential of digital technology in diabetes care remains underexplored, highlighting the need for further research to fully leverage its capabilities in disease control and prevention. This research topic aims to consolidate and disseminate the latest findings on the role of digital technology in diabetes management and prevention. The primary objective is to gather research reviews, case studies, and opinion pieces that explore the impact and application of digital tools in improving patient outcomes. The collection particularly welcomes clinical trials that investigate new treatments for diabetes through digital technologies such as telemedicine and remote rehabilitation to enhance patient care and management strategies. To gather further insights into the interdisciplinary scope of digital technology in diabetes care, we welcome articles addressing, but not limited to, the following themes: Innovative applications of digital technology in diabetes care; Effectiveness of monitoring tools and diagnostic technology in diabetes; Telemedicine and remote patient monitoring; Identification of at-risk populations; Identification of at-risk populations using artificial intelligence-based technologies; Patient education and engagement by non-face-to-face technologies; Digital intervention strategies; Data analytics and machine learning. *Lost Generation Journal*, 1973 **ECPPM 2022 - eWork and eBusiness in Architecture, Engineering and Construction 2022** Eilif Hjelseth, Sujesh F.
