World Series 2025:

Global Economic Prospects, June 2025 World Bank, 2025-06-10 The global economy is facing another substantial headwind emanating largely from an increase in trade tensions and heightened global policy uncertainty For emerging market and developing economies EMDEs the ability to boost job creation and reduce extreme poverty has declined Key downside risks include a further escalation of trade barriers and continued policy uncertainty These challenges are exacerbated by subdued foreign direct investment into EMDEs Global cooperation is needed to restore a more stable international trade environment and scale up support for vulnerable countries grappling with conflict debt burdens and climate change Domestic policy action is also critical to contain inflation risks and strengthen fiscal resilience To accelerate job creation and long term growth structural reforms must focus on raising institutional quality attracting private investment and strengthening human capital and labor markets Countries in fragile and conflict situations face daunting development challenges that will require tailored domestic policy reforms and well coordinated multilateral support *Global Economic Prospects, January 2025* World Bank Group, 2025-01-14 Global growth is expected to hold steady at 2.7 percent in 2025. However the global economy appears to be settling at a low growth rate that will be insufficient to foster sustained economic development with the possibility of further headwinds from heightened policy uncertainty and adverse trade policy shifts geopolitical tensions persistent inflation and climate related natural disasters Against this backdrop emerging market and developing economies are set to enter the second quarter of the twenty first century with per capita incomes on a trajectory that implies substantially slower catch up toward advanced economy living standards than they previously experienced Without course corrections most low income countries are unlikely to graduate to middle income status by the middle of the century Policy action at both global and national levels is needed to foster a more favorable external environment enhance macroeconomic stability reduce structural constraints address the effects of climate change and thus accelerate long term growth and development The Pro Gamer's Mindset ProPlayer, In the electrifying arena of mobile gaming in 2025 where 46 notifications 121 emails and 7 hours and 4 minutes of daily screen time per a 2024 digital report create a relentless digital rush the pro gamer's mindset is the cornerstone of success Unlike casual players who rely on sporadic bursts of skill a pro gamer thrives on a mental framework built on discipline resilience and focus This section defines these pillars exploring how they transform aspiring players into champions in the hypercompetitive world of esports Discipline is the commitment to consistent practice strategic planning and self control even when immediate rewards are absent It's the ability to grind through hours of training resist the lure of social media and prioritize long term goals over short term pleasures A 2024 psychological study found that disciplined gamers improve their in game performance by 30% over six months compared to 15% for those relying solely on talent For example a PUBG Mobile player who dedicates 2 hours daily to aim training as opposed to casual play enhances their accuracy by 25% per a 2024 esports analytics report Discipline ensures that desire for

victory is channeled into structured effort countering the chaos of 150 daily phone checks per a 2024 survey Resilience is the capacity to bounce back from setbacks losses toxic teammates or technical issues while maintaining a growth mindset In mobile gaming where matches can hinge on split second mistakes resilience separates amateurs from pros A 2024 study showed that resilient gamers recover from tilt emotional frustration 20% faster maintaining performance under pressure For instance a Call of Duty Mobile player who loses a clutch match but analyzes their gameplay instead of raging improves their win rate by 15% over time per a 2024 esports study Resilience transforms failures into learning opportunities aligning with the book s theme of mastering mindset for dominance World Bank East Asia and Pacific Economic Update, April 2025

Weltbank,2025 East Asia and the Pacific remains one of the most dynamic regions in the world Yet when measured against its own past performance and potential the region has under performed Growth in most economies and even output in several Pacific Island economies has not returned to pre pandemic levels Now rising global uncertainty is further dampening regional economic prospects Uncertainty increases financing costs and hurts business and consumer confidence inhibiting investment and consumption However short term uncertainty should not obscure long term trends in globalization climate and demographics that will affect trade growth and jobs in the EAP region These development challenges have been individually discussed in past Updates But an integrated analysis may help policymakers take a longer view through the current fog of uncertainty of what ultimately matters and what needs to be done This report illustrates the benefits of a synchronized three pronged approach harnessing technological change pursuing domestic reforms and deepening international cooperation
