Transformation (ICON-DEMOST 2023) Naili Ni'matul Illiyyun, Endang Supriadi, Ririh Megah Safitri, Masrohatun Masrohatun, 2024-01-05 This is an open access book Faculty of Social and Political Science State Islamic University Walisongo Semarang has been playing significant roles in building global peace and justice by conducting scientific research and creating a space for academic dialogue and discussion This goal is in line with our vision to be a Research Faculty based on the unity of sciences for humanity and civilization As part of the efforts to create a space for academic dialogue at a global level we organize an international conference which aims to develop scientific knowledge build institutional capacity and strengthen international networking The conference is also held to support State Islamic University Walisongo Semarang in

achieving its vision to be an Islamic world class university The conference raises the issue of democracy and social transformation to capture the social and political dynamics The selection of this topic is based on the idea that technological development is becoming a crucial issue within modern society in which people tend to experience alienation within the rapid social and political transformation Democracy as a political system that ensures transparency citizen participation and human rights protection is now under threat Having the fact that there is a growing tendency of using transactional politics to win political interests such as the use of money and identity in political processes therefore political analysts consider this situation as the regression of democracy Rapid social and cultural transformation as a consequence of advanced technology creates problems in modern society On one hand technology has made the life of people easier However on the other hand the sense of humanity's values and principles is declining This situation can be observed in the decrease in social solidarity and the rise of individualism Modernity that values productivity and economic growth has brought a negative impact on the life of human being and nature The exploitative character of industrialization has created an ecological crisis Advanced information technology has loosened social cohesivity and the rise of instrumental rationality has removed local genius or local wisdom from the life of society Since the ultimate goal of humanity is respecting the dignity of human beings hence bringing back humanity to the center of the development program is crucial especially in the current social and political dynamics In the political context humanity means respecting the basic rights of the citizen and putting them as a subject of political development and not perceiving citizens as only an instrument to win political power Based on the above background this conference is organized The overall goal of the conference is to mainstream humanity in the current social and political change The conference is also expected to be an arena for scholars and experts in social and political science as well as practitioners and policymakers to meet and exchange ideas and perspectives for a better future of our society
