Hunger Hotspots Food and Agriculture Organization of the United Nations,WFP, In the current edition of a regular joint bi yearly report the Food and Agriculture Organization of the United Nations FAO and the World Food Programme WFP warn that acute food insecurity is likely to worsen across 13 countries and territories identified as hotspots during the outlook period from June to October 2025 The Sudan Palestine South Sudan Haiti and Mali remain hotspots at the highest concern level while Yemen the Democratic Republic of the Congo and Myanmar are classified as hotspots of very high concern Other hotspots are Afghanistan Burkina Faso Chad Somalia and the Syrian Arab Republic Since the October 2024 edition Afghanistan and the Democratic Republic of the Congo have been elevated to hotspot status Conversely regional clusters in East Africa Ethiopia and Kenya and Southern Africa Lesotho Malawi Mozambique Namibia Zambia and Zimbabwe as well as Niger are no longer classified as hotspots due to improvements in climatic conditions Nigeria and Lebanon are also no longer classified as hotspots due to some improvement in the economic situation and a reduction in the intensity of military operations respectively Although these countries are no longer considered hotspots for the outlook period future economic and conflict related shocks or climatic shifts could lead to their reclassification For the outlook period funding for food and nutrition assistance falls critically short Funding for humanitarian assistance must not be reduced Instead urgent assistance should be scaled up to protect livelihoods and improve food access across all hunger hotspots This report outlines country

specific recommendations for urgent emergency responses as well as anticipatory actions to meet existing humanitarian needs and implement short term protective interventions before new crises emerge The report focuses on the most severe and deteriorating acute hunger situations but it does not represent all countries territories experiencing high levels of acute food insecurity

The Changing Focus of Regulatory Frameworks Around the Globe and the Opportunities for Harmonization Violeta Stoyanova-Beninska, Armando Magrelli, Daniel O'Connor, 2025-08-25 Regulation related to the development registration and monitoring of medicinal products has developed at different paces in regions of the world but the most quoted trigger for modern drug regulation is the thalidomide tragedy of the mid 20th century In the past decades a lot of progress has been made in the application and evolution of regulatory legislative procedures for the benefit of patients and public health but also in driving and enabling innovation Medicines development is a global endeavor and exchange of

experience and knowledge between regulatory agencies working under different jurisdictions is not only necessary but seen increasingly as essential. There are several factors playing a role in this process. Patients are increasingly well informed about their disease, existing treatments, and novel developments on the horizon and share information with others across regions. Scientific progress is facing a rapid development with impressive achievements in medicine, pharmacology, basic science, and technical disciplines. With this, we also face several novel challenges inherent with the possibilities that technology can provide, e.g., whole genome sequencing, AI, etc. Regulatory bodies are facing new challenges with decisions to be made faster for the sake of not delaying the availability and access to newly developed treatments. The COVID 19 crisis has only reiterated the need for collaboration, coherence, and solidarity on a global scale. With this in mind, we as guest editors are opening a research topic which is intended to invite experts from around the globe to contribute their views on the regulation of medicines today and in the future. More specifically, we expect manuscripts related to the following topics: Summary of the key aspects of the 3 main regulatory frameworks globally: USA, Europe, and Japan; commonalities and differences; Future changes to EU legislation; case study of drivers for change; Global trends in regulatory science that impact legislation; drug development and patient access; The importance of regulatory collaboration and harmonization and the role of not-for-profit organizations; Emerging regulatory frameworks: Africa, Latin America, and the ROW; Reliance regulation: pros and cons; is this the direction of travel? Novel regulatory procedures; case studies of innovation in regulatory practice; Future proofing the regulatory framework and the role of horizon scanning; Scientific advice and other regulatory support tools; Clinical trials: centralized versus decentralized; Digital revolution: impact of AI and ML; Drug device combinations; Specific regulatory pathways for innovative medicines; Possibilities for regulatory convergence. Type of articles expected but not limited to are: Original articles, Reviews.
