Underwriting Services and the New Issues Market George J. Papaioannou, Ahmet K. Karagozoglu, 2017-07-27

Underwriting Services and the New Issues Market integrates practice theory and evidence from the global underwriting industry to present a comprehensive description and analysis of underwriting practices. After covering the regulation and mechanics of the underwriting process, it considers economic topics such as underwriting costs and compensation, the pricing of new issues, the stock price and operating performance of issuing firms, the evaluation of new issue decisions, and an analysis of the many choices issuers face in structuring new issues. Unlike other books, it systematically develops a critical perspective about underwriting practices both in the U.S. and international markets and with a level of detail unavailable elsewhere, and an approach that reveals how financial institutions deliver underwriting services. *Underwriting Services and the New Issues Market* delivers an innovative and long overdue look at security issuance. Foreword by Frank Fabozzi. Covers underwriting contracts and arrangements on pricing and costs. Focuses on the financial consequences of the issuance decision for the firm. Describes and evaluates decisions regarding the features and structure of new security offerings.

Return on Strategy Michael Moesgaard, Morten Froholdt, Flemming Poulfelt, 2009-12-04. Why is it that many companies meticulously following recipes on management and strategy fail? Did Google, Skype, Ryanair, Huawei, and a number of other successful companies buy into a well thought out strategy and adhered to that over time? How do companies deliberately opting out of the recipe game and opting into the out of the box thinking fare? In short, why is it that some companies achieve a higher Return on Strategy than others? Whereas Return on Investment (RoI) has attracted increased attention over the last couple of decades, little if any attention is being paid to whether companies do at all achieve Return on Strategy (RoS) and how. This book provides an overview of contemporary strategy literature and recipes brushed up with a view to identifying explanations as to how recipes have seldom worked as intended. One out of several reasons rests on the fact that recipes do not take the so called X factor into account. With the X factor as the starting point, the book examines a sample of 50 global companies of which some have achieved a remarkable high Return on Strategy and others failed. The 50 companies covers most continents as some are from North America, some are from the European continent, and others are from different parts of the emerging Asian region, threatening companies from the Western hemisphere. The book explains the reason behind success and failures and provides practical tools as to how companies may increase their Return on Strategy. In the toolbox, you will find a framework on how to increase the Return on Strategy as well as a number of dynamic positioning tools, road maps, and bearing points. Invariably, more and more companies, including consultants, business leaders, and MBAs, now work diligently in order to increase their Return on Strategy, and the best of them are here to stay successfully. Are you?
