The New Deal

During the Great Depression in the 1930s, many people in the United States were struggling. President Franklin D. Roosevelt wanted to help them, so he came up with a plan called the New Deal.

The New Deal was a series of programs and reforms that aimed to provide relief, recovery, and reform to the country. Relief meant helping people who were suffering, recovery meant getting the economy back on track, and reform meant making changes to prevent another depression from happening.

One of the most famous programs of the New Deal was the Civilian Conservation Corps (CCC). This program provided jobs for young men to work on conservation projects like planting trees, building trails, and fighting wildfires. The CCC not only helped the environment but also gave young men a way to support themselves and their families.

Another important program was the Works Progress Administration (WPA). The WPA created jobs for millions of people by building roads, bridges, schools, and other public works projects. These projects not only provided much-needed employment but also helped to improve the country's infrastructure.

The New Deal also included programs like the Social Security Act, which provided financial assistance to the elderly, disabled, and unemployed. This act created a safety net for people who were struggling to make ends meet.

While the New Deal was not perfect and did not end the Great Depression, it did help to improve the lives of many Americans. It showed that the government could play a role in helping its citizens during difficult times.

In conclusion, the New Deal was a series of programs and reforms created by President Franklin D. Roosevelt to help the country during the Great Depression. It provided relief, recovery, and reform to the American people and showed the importance of government assistance during times of crisis.

Oakhill, 2013-04-03 Recognizing the characteristics of children with learning disabilities and deciding how to help them is a problem faced by schools all over the world Although some disorders are fairly easily recognizable e g mental retardation or very specific to single components of performance and quite rare e g developmental dyscalculia schools must consider much larger populations of children with learning difficulties who cannot always be readily classified These children present high level learning difficulties that affect their performance on a variety of school tasks but the underlying problem is often their difficulty in understanding written text In many instances despite good intellectual abilities and a superficial ability to cope with written texts and to use language appropriately some children do not seem to grasp the most important elements or cannot find the pieces of information they are looking for Sometimes these difficulties are not immediately detected by the teacher in the early school years They may be hidden because the most obvious early indicators of reading

progress in the teacher's eyes do not involve comprehension of written texts or because the first texts a child encounters are quite simple and reflect only the difficulty level of the oral messages sentences short stories etc with which the child is already familiar However as years go by and texts get more complex comprehension difficulties will become increasingly apparent and increasingly detrimental to effective school learning In turn studying assimilating new information and many other situations requiring text comprehension from problem solving to reasoning with linguistic contents could be affected Problems with decoding dyslexia and language disorders have attracted more interest from researchers than have specific comprehension problems and have occupied more room in specialized journals Normal reading comprehension has also been a favorite with researchers However scarce interest has been paid to subjects who have comprehension difficulties This book is an attempt to remedy this situation In so doing this volume answers the following questions Does a reading comprehension problem exist in schools How important and widespread is the problem Is the problem specific How can a reading comprehension difficulty be defined and identified Does the syndrome have a single pattern or can different subtypes be identified What are the main characteristics associated with a reading comprehension difficulty When can other well identified problems add to our understanding of reading comprehension difficulties Which educational strategies are effective in preventing and treating reading comprehension difficulties What supplementary information can we get from an international perspective
