Changing World Economic Order in the Post-Pandemic Period Mahapatra, Sushanta Kumar, Sarin, Vishal, 2023-06-02 Post COVID 19 the world will never be the same The pandemic not only shattered many assumptions about economic developments and growth but it also challenged our preparedness to face any unpredictable challenge as a human civilization in an era where science and technology is at its peak To suppress the spread of COVID 19 many countries resorted to partial or full closure of their borders and restricted the movement of people Mandatory quarantine restricted labor mobility and workplace closure which later converted into supply shocks in the economy as these measures impaired

the economy's production capacity disrupting supplies. This later spilled over to the demand side as people were locked down in their homes and workers were laid off and lost income. This disruption posed many new challenges for policymakers to formulate appropriate macroeconomic policy responses and also provided them the opportunity to ponder upon the preparedness of countries in terms of health facilities, appropriately compensating human resources, how to cushion immediate and severe economic shocks, and how to maintain the livelihood of the society as a whole. *Changing World Economic Order in the Post Pandemic Period* provides scientific knowledge of the current economic scenarios across the globe with a comprehensive overview of the pandemic and regional initiatives, trends of trade and development, and approaches to overcome obstacles of globalization and the impacts on global trade and economic development in light of the pandemic. The chapters present tangible solutions and attainable perspectives for fighting a battle against the pandemic while keeping the morale of the people and economy high. Highlighted topics include post pandemic economic development, public policy in emergency situations, socio-economic impacts on enterprises, risk governance, and impacts of COVID-19. This book is ideally intended for university students, researchers, policymakers, economic actors, economists, practitioners, stakeholders, government officials, academicians, and anyone interested in the impact of a pandemic on the global economy and how to deal with such issues in the future.

Workforce shortage in a digital era. Can 100% remote work attract more qualified candidates? Huong Hoang Thien, 2023-05-25 Master s Thesis from the year 2023 in the subject Leadership and Human Resources Recruiting grade 1 0 language English abstract What will happen if there aren t enough talents to fill the market in the future due to the demographical change This study focuses on the potential of offering 100% remote work to counteract the workforce shortage in Germany An empirical study has been conducted as an online survey to gain an overview of Germany s 100% remote job market In a fast changing world digital transformation has become an evitable process for companies to adapt to new technologies and market trends The digital transformation in Germany has been significantly impacted by the COVID 19 pandemic positively and negatively On the one hand the pandemic forced German companies to embrace new technology more quickly and adapt to remote work However on the other hand it pointed out Germany s weaknesses in digital infrastructures and cybersecurity Additionally many German companies face a shortage of workers due to digital transformation Another reason that causes workforce shortage is demographical change Companies cannot operate their business correctly increase revenue or drive innovations to survive in a competitive market without suitable candidates Furthermore the digital revolution shaped the current digital generations as potential workers exhibit different digital behaviors and preferences Therefore companies must know them and their work preferences to fill the workforce shortage gap Remote working as a sub trend of the mega trend New Work has become the new standard for workers especially since the pandemic However there aren t any specific regulations regarding remote work in Germany yet In general remote work provides workers e g more freedom and a better work life balance Nevertheless remote work also has the downside such as workers experiencing isolation and loneliness due to the lack of social contact with co workers less productivity outside of the office etc For companies offering remote work gives them complete access to the talent pools including freelancers as external workers reducing costs due to fewer offices being more attractive to job seekers But on the other side remote leadership has become a big challenge for leaders Furthermore companies have to deal more with cyber security When everything s going remotely companies have become an easier target of cyber attacks
