Digital Business and Electronic Commerce Bernd W. Wirtz, 2024-06-04 This textbook introduces readers to digital business from a management standpoint. It provides an overview of the foundations of digital business with basics activities and success factors and an analytical view on user behavior. Dedicated chapters on mobile and social media present fundamental aspects, discuss applications and address key success factors. The Internet of Things (IoT) is subsequently introduced in the context of big data, cloud computing and connecting technologies with a focus on industry 4.0 and the industrial metaverse. In addition, areas such as smart business services, smart homes and digital consumer applications as well as artificial intelligence, quantum computing and automation based on artificial intelligence will be analysed. The book then turns to digital business models in the B2C business to consumer and B2B business to business sectors. Building on the business model concepts, the book addresses digital business strategy, discussing the strategic digital business environment and digital business value activity systems (dVASs) as well as strategy development in the context of digital business. Special chapters explore the implications of strategy for digital marketing and digital procurement. Lastly, the book discusses the fundamentals of digital business technologies and security and provides an outline of digital business implementation. A comprehensive case study on Google Alphabet explains Google's organizational history, its integrated business model and its market environment, rounding out the book.

The Metaweb Bridgit DAO, 2023-10-09 Buckle up for a fascinating journey through layers of insight and metaphors that explain the past, present and future of the Web. Readers from all walks of life will learn something ancient, something novel and something practical. Those who give it careful consideration will never see the Web the same way again. This book proclaims into existence decentralized public space above the webpage that enables the shift from personal to collective computing. The Web's next frontier is the Metaweb, a hyper-dimensional web over Today's Web that connects people and information silos with accountability and fair value exchange. The Metaweb can drastically reduce false information, abuse and scams as well as enable the unprecedented level of collaboration needed to address humanity's global challenges. The book posits a symbiotic relationship between AI and the Metaweb where AI assists in generating, organizing and curating content while the Metaweb provides the necessary constraints, data and context for AI to function effectively, transparently and in alignment with humanity. The AI-assisted collaboration among humans on the Metaweb will enable a vast collective intelligence and the capture of tremendous, untapped value. Storytelling With Data Hans-Wilhelm Eckert, 2022-10-31 This book shows the role data plays in communication and marketing and how it can be used as an important source for storytelling. Because data as a raw material of the digital age inspires corporate strategy, provided it is collected, interpreted and processed properly, it provides new and sometimes surprising insights into contexts and offers the opportunity to develop exciting stories from it. Stories that also create relevance with regard to corporate goals, spark dialogues and make communication effective. The author explains in an

easy to understand way how data based communication strategies can be turned into gripping stories He also provides useful tools and shows why data can lie how important its visual processing is where its use meets ethical limits and why data protection is also a business opportunity Using practical examples the book offers marketing and communication experts but also interested managers from other disciplines numerous inspirations and new perspectives *Business Drivers in*
